

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

## LETTER OF TRANSMITTAL.

---

STATE OF MISSOURI, BUREAU OF LABOR STATISTICS AND INSPECTION, }  
CITY OF JEFFERSON, November 5, 1891. }

*To his Excellency* DAVID R. FRANCIS,

*Governor of Missouri, Jefferson City, Mo.:*

DEAR SIR—I have the honor to submit herewith the 13th Annual  
Report of this Department, for the year ending November 5, 1891.

Very respectfully,

WILLARD C. HALL,

Commissioner.

# INTRODUCTORY.

---

The act creating the Bureau of Labor Statistics and Inspection, passed in 1883, authorizes the Labor Commissioner to collect, assort, systematize and present in annual report to the Governor, to be by him transmitted biennially to the General Assembly, statistical details and information relating to all departments of labor in the State, especially in its relations to the commercial, industrial, social, educational and sanitary condition of the laboring classes, and to the permanent prosperity of the productive industries of the State, and also the inspection of mines, factories, etc.

The ground covered by this act is so broad that it would be difficult for the Labor Commissioner to take up an investigation that would be outside of his line of duty. An investigation showing the agricultural and mineral resources or the manufacturing interests of the State is just as much his duty as to show the wages of working people or inspect the factories of the State.

The Thirteenth annual report of this Department contains two volumes. The following investigations are taken up and discussed in Vol. I: Bi-weekly Payment Law. Non-transferable Checks. Strikes and Boycotts. Labor Agents. Missouri's Surplus. Manufacturers' Returns. Factory Inspection. Working Women. Actual Wages of Employees. Earnings and Expenses of Workingmen Compared. Family Budgets. Penitentiary Contractors.

Vol. II relates to Mines and Mining.

# THE BI-WEEKLY PAYMENT LAW.

---

The Thirty-sixth General Assembly passed what is known as the Bi-weekly Payment law. This law went into effect June 22, 1891, and was an amendment to section 7059 of the old Mining law.

On the 30th of June, your Commissioner received the following letter:

STATE OF MISSOURI, EXECUTIVE DEPARTMENT, }  
CITY OF JEFFERSON, June 30, 1891. }

Hon. W. C. HALL, Labor Commissioner :

DEAR SIR—I desire to call your attention to the bi-weekly payment bill passed at the last session of the Legislature, and which went into effect on the 22d inst. It requires mine operators to pay their employes at least once in two weeks, and does not authorize the withholding of any portion of the wages due them. It differs from the old law in that the latter only required payment once per month, and permitted the retention of four days' wages on any regular pay-day. I suggest that you send to the mine operators of this State copies of the new law, and advise them that it is the intention of the authorities to see that the spirit and letter of the law is observed and enforced in every respect.

Respectfully,

DAVID R. FRANCIS, Governor.

Acting upon these instructions, I issued the following circular letter and sent a copy to each of the 804 mine operators of Missouri :

BUREAU OF LABOR STATISTICS AND INSPECTION, }  
JEFFERSON CITY, June 30, 1891. }

*To the Mine Operators of Missouri :*

I desire to call your attention to an amendment of section 7059 of the Mining law of Missouri, in relation to payment of employes. The section as amended reads as follows :

SEC. 7059 The employes of operators of mines, mentioned in this article, shall be regularly paid, at least once in every fifteen days, and at no pay-day shall there be withheld [any] of the earnings of any employe. And such operators shall, whenever demand therefor shall be made by any employe, issue to such employe a due-bill for the amount due him up to the day of the demand, which due-bill shall be negotiable, whatever the form thereof shall be, and shall be redeemed by such operator in cash or its equivalent, at the option of the holder, on demand, if the same shall be presented for redemption by any holder thereof ; and any such operator failing or refusing to pay his employes, or to issue to them his due-bills, as in this section provided, shall become immediately liable to any such employe in double the sum due such employe at the time of such failure or refusal, to be recovered by civil action, in the name of such employe, in any court of competent jurisdiction of the State. And no employe, within the meaning of this article, shall be deemed to have waived any right accruing to him under this section by any contract he may make contrary to the provisions hereof.

The mine operators of Missouri will be expected to comply with this law in every respect.

WILLARD C. HALL,  
Commissioner.

In the great lead and zinc mining region of Southwest Missouri, the rule has always been to pay weekly in cash. The Mine LaMotte lead mines in Madison county paid bi-weekly before the late law took effect, but retained several days' wages on each pay-day. As soon as they were informed of the change in the law, they at once adopted its provisions and now pay bi-weekly and withhold nothing. They said to a representative of the Bureau "that while they thought the law harsh and would much prefer paying within three days of pay-day, that they were law-abiding and acquiesced at once." They found that the law caused them some trouble and labor, but they did not find it necessary to employ any additional clerical force. The St. Joseph lead mines are the largest in the United States, and with a single exception, the largest in the world, employing 800 men. They are complying with the law without additional help or expense by dividing their employes into three classes, paying each class on a different day. This fully disposes of the objection made by many operators, that it is impracticable if not impossible.

Your Commissioner has given this subject anxious thought, solicitous for the welfare of the wage-earner, at the same time not unmindful of the interest of the employers—believing that any law passed and enforced to the detriment of employers must eventually react on the employes. But I am unable to divest my mind of the strong conviction that the man who works at manual labor for wages that scarcely more than command the primary necessities of life, should have the right to demand and receive the value of his toil in lawful money of the United States, at least bi-weekly. The next objection of importance that has been advanced is, that if employes are paid frequently, weekly or bi-weekly, they will visit the dramshops, and not only spend their money, but by dissipation disqualify themselves for work for several days after pay-day. It is a lamentable fact that wage-earners, as a whole, though there are a few exceptions, spend more of their earnings for drink than a proper idea of economy would inculcate. The proportionately larger number of dramshops in Festus, a town where a large number of workingmen live, and Mexico, a town supported mostly by agricultural interests, indicates that the farmers do not spend as much for drink as the men in the glass-works at Crystal City. A comparison between Bevier, a coal-mining town, and any town of even more inhabitants patronized mostly by farmers, would show equally favorable to the agricultural class. The question is, have employers any right to arrogate paternal control over their employes? They might after a while conclude that they could buy their groceries and clothing to a better advantage. The argument would be absurd if

it were not apparent that this solicitude often proceeds from a pecuniary rather than a moral interest. Many companies have stores; their employes have necessities; they are not prudent in getting and saving money; by fixing pay-day at long intervals and withholding a week or more wages at each pay-day, the employe takes his wages largely, if not altogether, in goods bought at the only place he can obtain them without the cash, viz.: the company's store.

Bi-weekly payment, with not more than three days' pay withheld at each pay-day, is but a just demand by the working people. With the money to buy where they please, the objection to the company store would cease; then if the company kept a store, it would have to offer inducements and compete for trade. A large saw-mill owner told an agent of the Bureau that he paid his men in cash weekly, because they would work for him cheaper than they would for those who deferred payment for a month or more and kept a store; besides, the men were cheerful and accomplished more work. Nearly all the mine operators of the State have shown a disposition to comply with the new law, at least in part. It is true that several of the large coal operators withhold five to twenty days' wages on pay-day, but they pay their employes every two weeks. This partial compliance is better than no compliance at all. The Keith and Perry Coal company of Rich Hill, Bates county, Charles Morgan of Barton county and John Breckenridge of Randolph county have shown no disposition to comply with the bi-weekly payment law in whole or in part, and your Commissioner is of the opinion that these gentlemen will continue to violate the present law until it is so amended as to make it operative. With the present law, damages can be recovered only by civil action, and a mine employe is not very likely to pay a lawyer's fee and bring suit against his employer when he knows his discharge would follow immediately after. If the law were changed making it a misdemeanor for non-compliance, I think it would be effective. In this way information could be filed with the prosecuting attorney of the county in which the offense was committed, and the informant's name need not appear at all. The mine operators whose names are mentioned, in a conversation with your Commissioner say that "it is a physical impossibility to comply with the new law;" but at the same time they do not explain how it is that mine operators who employ as many or more employes than they do are complying with the law.

#### NON-TRANSFERABLE CHECKS.

Several of the mine operators of the State, who have company stores in connection with their mines, have been issuing to their

employees in payment for wages, non-transferable checks or due bills on the company stores. This is a violation of section 7058 of the Revised Statutes of Missouri, which says: "All such checks or due-bills shall be negotiable," and of course a "non-transferable check" cannot be negotiable. The operators who have been issuing these illegal checks or due-bills are the Kansas & Texas Coal company, Loomis & Snively and the Watson Brothers, all of Bevier, Macon county.

Information was filed by your Commissioner with the prosecuting attorney of Macon county against these three parties, and the cases were set for trial in the Macon circuit court for September 30th. In the mean time the following letter was received from the Kansas & Texas Coal company:

OFFICE KANSAS AND TEXAS COAL CO.,  
St. Louis, July 24, 1891. }

WILLARD C. HALL, *Commissioner*:

DEAR SIR—Replying to your favor of the 20th inst., relative to non-transferable merchandise books used by this company, and to our recent conversation upon this subject, I beg to advise you that our attention had not been before called to the fact that they were in violation of section 7058 of the Revised Statutes of Missouri. It is the desire and intention of the management of this company, at all times, to comply with existing laws, and we have, therefore, taken immediate steps to discontinue entirely the use of the checks above mentioned.

Owing to the large number now in circulation, it will be impossible for the company to properly protect the men from loss in their redemption, as well as prevent a complication of our accounts, to place an earlier date for their discontinuance than September 1. This will allow us a little more than a month in which to redeem all outstanding checks. I trust this arrangement will meet with your approval.

Yours truly,

W. P. HEATH, Sec'y and Treas.

It is the desire of the Bureau to have the law complied with, and not to persecute any one, and as the Kansas and Texas Coal company have discontinued the use of the checks, your Commissioner requested the prosecuting attorney of Macon county to dismiss proceedings against them, which was done. The other operators above mentioned were found guilty and fined \$10 and costs.

# STRIKES.

---

## STRIKE OF ST. LOUIS ROLLING MILL EMPLOYEES.

The skilled men of this establishment have an organization, known as Lodge No. 6, Amalgamated Association of Steel and Iron Workers of the United States. Although the owner of the mill in 1888 had signed, after a strike of short duration, the Union scale of wages, he had nevertheless failed to carry out the same. The Union rule plainly fixes the price for a ton of sheet iron or steel turned out by the men according to the gauge, and requires that this full amount be paid to the roller as the head of the mill gang, and that the latter disburse one-fourth of the money to the heater and one-fifth to the shearer. The proprietor of this mill, however, followed a usage quite at variance with the Union rule, as he retained one-fifth of the amount due the gang and paid the shearer himself. He claims that he has improved machinery with which one man can do the work of three, that he pays Union rates to the man tending to the shears, and that he must have entire control over the shears in order to save material.

The men deny that the machinery used in this mill for cutting is in any way superior to that in other mills. They claim that the shortage in the number of competent shearers causes them a great deal of loss, as a man who has to work in a great hurry is able to throw many a sheet that has only a little crack or flaw in it on the waste pile, for which half of the regular rate is only paid. A shearman who is paid by the employer and not by the head of the gang according to the number of tons of material he turns out, has no inducement whatever to look after the interest of the men engaged in rolling the sheets, but will naturally look to the interest of the employer who pays him. They further claim that this St. Louis mill, by the above-mentioned usage, gained an advantage over its Eastern competitors, as it could manufacture sheet iron or steel from 10 to 15% cheaper per ton than the Eastern mills.

The men had silently tolerated this deviation from their rules for ten years, and would have probably done so for many years to come had it not been for the Eastern mills, who brought strong pressure to

bear upon the Association and the local lodge to enforce the Union scale in this mill as in others, or they would see their organization annihilated.

On July 1 the mill owners were visited by a committee and requested to comply with the Union rule pertaining to the pay of the shearman. They were briefly told that the proprietor of the mill would not accede to their demand, whereupon the men struck. A few days later the men were notified to apply for work early, as the mill was going to be started again. A preference would be given to the old employes, but they had to apply singly, and not as a Union. Ever since the proprietor has refused to enter into negotiations with the Union, fully determined to run a non-union mill.

Later, in August, efforts were made to get men wherever they could be had. Up to October 1 eleven men arrived from England, all skilled rolling-mill hands, but they refused to work in the mill as long as the Union scale was not signed.

See details of strike in following table:

| Name of establishment.      | Number of men who struck..... | Duration of strike in work-days..... | Average wages before strike..... | Average wages after strike..... | Loss in wages to employes on account of strike..... | Loss to employers on account of strike..... | No. of men who lost position by strike..... | No. of new men taking place of strikers..... | Amount of relief paid to strikers by labor organization..... |
|-----------------------------|-------------------------------|--------------------------------------|----------------------------------|---------------------------------|-----------------------------------------------------|---------------------------------------------|---------------------------------------------|----------------------------------------------|--------------------------------------------------------------|
| St. Louis Rolling mill..... | 109                           | 79 to Oct. 1                         | \$1 50 to \$1 11                 | \$1 50 to \$1 11                | \$17,004 till Oct. 1                                | Unk.                                        | ?                                           | ?                                            | \$948 to Oct. 1                                              |

## STRIKE OF TIN, SHEET IRON AND CORNICE WORKERS.

The Tin, Sheet Iron and Cornice Workers' National Union joined the Building Trades Union on May 1st in their struggle for reduction of the hours of labor and advance in wages. They demanded that eight hours constitute a day's work with the former pay of ten hours: that is, an increase in wages of 25%. Any over-time should be paid at the rate of time and a half. Further, they demanded the adoption of certain shop rules, according to which the bosses should not be allowed to keep more than one boy to six men in their shops. When these demands were rejected, the strike was declared.

The employers acted in strict concert. They had lists (black lists) of all strikers; the names of the objectionable men, that is those who were not wanted any more, were marked—the rate per hour being attached to their names on the list. About fifty copies of these lists had been divided among the employers.

Considerable loss was sustained by the proprietors. Many of the strikers left the city a few weeks after the strike was declared; others took whatever work they could obtain. By October 1st the strike had died out, though it was not declared off.

See table for details.

| Name of establishment.              | Number of men who struck | Duration of strike in work days | Average wages before strike | Average wages after strike | Loss in wages to employees on account of strike | Loss to employers on account of strike | No. of men who lost positions by strike | No of new men taking places of strikers | Am't of relief given to strikers by labor organizations |

## STRIKE OF THE CABINET-MAKERS.

### BEATTIE MANUFACTURING CO.

Forty-one cabinet-makers, all belonging to the Furniture Workers' Union, No. 12, of St. Louis, together with six varnishers and one machine hand, struck on January 2, 1891, because they would not submit to certain shop rules which the company attempted to introduce in the establishment. According to these rules, a man who was not in the shop at 7 a. m. sharp had to suffer a deduction of one hour from his day's work, and further, all employees were required to report to the watchman both when entering and leaving the shop. The men had been notified of this innovation in December of last year. They, however, considered these rules arbitrary, and determined not to submit to them under any circumstances.

The strike lasted over two months, and seldom has a contest been fought with more harmony, energy and persistence. When, at last, the company saw the determination of the men not to give in, they withdrew the obnoxious shop rules. The strike was declared off in a meeting of the Union on March 4. Those of the men who had not yet found other

employment returned to work in the shop. Although the police arrested some of the strikers on the charge of disturbing the peace, in no case could this charge be sustained. This strike, as well as all others that occurred during the present year, and there were a great many of them, was conducted in the most orderly manner. See details of strike given in table below.

| Name of establishment.         | No. of men engaged in strike..... | Duration of strike in work-days..... | Average daily wages before strike..... | Average daily wages after strike..... | Loss in wages to employees on account of strike..... | Loss to employer on account of strike... | No. of men who lost positions by strike | No. of new men taking places of strikers | Am't of relief given by labor organizations to strikers..... |

### STRIKE OF THE MOULDER HELPERS.

This craft is not organized. Last spring an organization was attempted, but was not successful.

In all the city shops the rate of wages varies from \$1.25 to \$1.50 per day, ten hours constituting a day's work. The men connected with the St. Louis Iron and Machine works went on a strike May 2d, at which time their demand for a minimum rate of \$1.50 per day was refused.

The following table shows the result of their strike:

| Name of establishment.              | Number of men who struck..... | Duration of strike in work-days..... | Average daily wages before strike..... | Average daily wages after strike..... | Loss in wages to employees on account of strike..... | Loss to employer on account of strike... | No. of men who lost positions by strike.. | No. of new men taking places of strikers | Am't of relief given by labor organizations to strikers..... |

## THE MARINE FIREMEN'S STRIKE.

The colored firemen on the large Mississippi river boats organized March 25, 1891, as Marine Firemen's Protective Union No. 1, branch 5464, of American Federation of Labor. The special object of this organization was to obtain a fair rate of wages, and to elevate the firemen in the social scale. For years they had complained of low wages, poor board and bad treatment, but had never been heard. They, therefore, inaugurated a strike on April 1, after their demands for an advance in wages from \$30 to \$40 per month and recognition of their Union had been flatly refused. The strike, which was conducted in an orderly way, lasted one month. The Anchor line acceded to the demands of their men, and the strike was declared off on May 1, 1891.

Details of the strike are given in the following table:

| Name of boats.            | Number of men who struck..... | Duration of strikes in work-days..... | Average monthly wages before strike. | Average monthly wages after strike. | Loss to men in wages on account of strikes | Loss to employers on account of strike... | No. of men who lost positions on account of strikes..... | No. of new men taking places of strikers | Am't of relief given to strikers by labor organizations..... |

## STRIKE OF QUARRYMEN.

The quarrymen of the city, organized as Branch 48, Quarrymen's National Union, that had struck on May 1, 1890, for a reduction of the hours of labor from ten to eight per day and had been unsuccessful, tried once more on May 1 of the present year. They demanded an eight-hours' work-day with \$2.50 pay, the amount they had received for ten hours' work. The employers claimed that they were unable to accede to the demands of their employes, because it would cause their teams to be idle for a considerable length of time per day and result in great loss to them; and, further, they could not compete under these new conditions with the large quarries in Grafton, Alton and other suburbs of the city, all of which quarries were worked by men who received less wages and worked longer hours. On May 11 a committee of employers and employes accepted a compromise according to which the men should receive \$2.50 for a nine-hours' work-day. The compromise was indorsed by the strikers in a general meeting on the evening of May 12, and the strike was declared off.

The following table shows details of the strike:

| Name of establishment. | Number of men who struck | Duration of strike in work-days | Average daily wages before strike | Average daily wages after strike | Loss in wages to employes on account of strike | Loss to employer on account of strike | No. of men who lost positions by strike. | No. of new men taking places of strikers | Am't of relief given to strikers by labor organizations |

## STRIKE OF THE EMPLOYES IN CENTRAL TYPE FOUNDRY.

In January of the present year, the proprietors of this establishment introduced gas as fuel in the furnaces, instead of coal, thus increasing their daily expenses for fuel per machine from eight to about thirty cents per day. As the employes work by the piece, and this change gave them an opportunity to increase their wages, the company thought they should also defray a part of the expenses, and taxed them accordingly ten cents a day for the privilege of using the gas furnaces. Employes refused to pay such tax, and threatened a general strike if the employers enforced their requirement. Thereupon the latter proposed a compromise: they left it entirely to employes to work at either gas or coal machines, but those who preferred to work at a gas machine would be expected to pay ten cents per day to employer for this privilege. The cause of the trouble seemed to be removed, when one of the men who is said to have violated the rules of the shop was dismissed by the foreman. Then twenty-two men struck because their demand to the company to re-instate this man was not complied with. It seems, however, that the strikers had some other grievances which caused them to follow such a course: namely, that their hats and coats were locked up by the foreman during working hours, and that this young man, a son of one of the proprietors, subjected them to indignities. The strike lasted some twenty-four days. As business was very slack, the proprietors had no trouble in finding all the help they needed.

The following table shows details of the strike :

| Name of establishment.     | Number of men who struck..... | Duration of strike in work-days ..... | Average wages before strike ..... | Average wages after strike ..... | Loss in wages to employes on account of strike ..... | Loss to employers on account of strike ..... | No. of men who lost positions by strike .. | No. of new men taking places of strikers .. | Am't of relief given to strikers by labor organizations ..... |

## STRIKE OF CARPENTERS.

On December 30, 1890, the District Council of the Brotherhood of Carpenters and Stair-builders, representing fifteen local Unions, sent a demand to all the boss builders, carpenters and contractors in the city, asking for an advance in wages from 35 to 40 cents per hour. As a

day's work consisted of eight hours, this was equal to an advance of 40 cents per day. Some seventy bosses replied that they would not grant any advance in wages which they thought were high enough, and would never acknowledge a Union that claimed the right to fix wages. The remaining bosses were not heard from at all. Thereupon the District Council decided to declare a general strike to commence on the first day of May, 1891. Four weeks previous to that date, the above mentioned demand was repeated to the bosses. The first day of May was declared a holiday and the men were instructed to demand on May 2d, 40 cents per hour, and to stay out if refused. A great many bosses, however, acceded at once to the demand of the men, and about sixty per cent of the men, those who had celebrated May 1st, went back to work on May 2d or soon thereafter.

In the meanwhile fifty-two bosses, determining to offer resistance to the last, organized as the Boss Builders' and Carpenters' Association. But as many of them had on hand contracts and would suffer by the delay, their resistance soon ceased. On May 20th all but four had granted the demand of the strikers. On the same day the strike was declared off by the unanimous vote of the assembled Unions.

The following table shows details of strike:

| Name of establishment.     | Number of men who struck | Duration of strike in work days. | Average wages before strike. | Average wages after strike. | Loss in wages to employees on account of strike. | Loss to employers on account of strike. | No. of men who lost positions by strike. | No. of new men taking places of strikers. | Am't of relief given to strikers by labor organizations. |

## THE PAINTERS' STRIKE.

The painters of St. Louis are organized in two separate bodies: the Journeymen Painters' Union of Missouri, branches 1, 2 and 3, and the Brotherhood of Painters and Decorators of America, local Unions 115, 137 and 235, affiliated with the American Federation of Labor. The latter organization, the younger of the two, was started in the Spring of 1888, and has ever since followed a somewhat antagonistic course toward the local Union. Prior to the 1st of April they made a demand on the master painters for 35 cents an hour as a minimum rate, eight hours constituting a day's work. When their demand was not complied with they contemplated a strike for April 1st, but for some reasons unknown to outside parties, abandoned this plan. Holding a seat, however, in the Building Trades Council, they decided to join the Amalgamated Building Trade Unions in their struggle for an advance in wages on May 1st. On May 3d (Sunday) they held an open mass meeting, where the strike was discussed and voted on, and a large majority were in favor of it. The master painters, fully prepared for this emergency, and also not ignorant of the want of harmony (not to use a stronger expression,) between the two organizations, were determined in spite of their many contracts on hand, to fight the brotherhood to the last. No sooner, however, had the struggle begun than the men discovered that they had overrated their strength. An appeal to the local Union for help was ignored by that body. Then there was nothing left for them but to surrender. Their defeat was disastrous.

The result of this strike is shown in the following table:

| Name of establishment.        | Number of men who struck..... | Duration of strike in work days..... | Average daily wages before strike..... | Average daily wages after strike..... | Loss in wages to employees on account of strike..... | Loss to employers on account of strike..... | No. of men who lost positions by strike..... | No. of new men taking places of strikers..... | No. of relief given to strikers by labor organizations..... | Amt. of relief given to strikers by labor organizations..... |

### MARBLE SETTERS' AND POLISHERS' STRIKE.

The Marble Cutters' Union decided to join the building trade unions in their struggle for an advance in wages on May 1, 1891. They ordered out those marble setters who do work outside the shop and come in contact with the building trades, who for the last 5 years had worked for only 8 hours a day. Their demand for an increase of 20 per cent of their wages (\$3 instead of \$2.50 for 8 hours work) was rejected by the employers, and the strike declared. But the bosses to whom the fight was offered, when least expected, were soon forced by their contracts, which had to be carried out in a given time, to submit to the dictates of the Union.

Table A shows details of this strike.

No sooner was this strike settled in favor of the Union than the marble polishers of the Pickle Stone and Marble company thought their time had come to do away with an old grievance. They had to do piece-work in this shop, and had averaged only \$1.75 to \$2.50 per day. On May 15 they refused to work by the piece, and demanded \$2.50 daily wages for 9 hours' work. When their employers did not accede to their wishes, they struck. This struggle lasted, however, only four days. The above-mentioned circumstances caused the employers to grant this demand also.

See table B for details:

## STRIKE OF STAIR-BUILDERS.

Union No. 578 of the Brotherhood of Carpenters and Stair-Builders comprises the latter craft. Previous to May 1st of the present year they had worked nine hours at 35 cents per hour. They tried to get on the same footing with their fellow-workmen of the carpenter unions, and decided to join them in the May strike. Their demands were eight hours at 40 cents an hour. The bosses granted these rates for outside work, that is work on buildings, without a word, but declared that they would maintain the old rates for all work in the shops. Thereupon the men struck. The master stair-builders, however, weakened, and when by the 13th of May all but a few smaller establishments had complied with the demands of the strikers for inside work also, the strike was declared off by the unanimous vote of the Union.

Details of same given in table below:

| Name of establishment.   | Number of men who struck | Duration of strike in work-days | Average wages before strike | Average wages after strike | Loss in wages to employees on account of strike | Loss to employers on account of strike | No of men who lost position by strike | No of new men taking places of strikers | Am't of relief given to strikers by labor organizations |

## STRIKE OF THE ARCHITECTURAL IRON WORKERS.

The craft organized as Architectural Iron Workers' and Chippers' Union, comprising the setters, fitters, chippers and laborers in the architectural iron trade, were among those who struck on May 1st for an advance in wages and a reduction of the hours of labor. The principal demand was the reduction of hours from 10 to 8 a day. The increase of wages was as follows:

Setters from 20 cents per hour to 32½ cents per hour.

Fitters from 20-25 cents per hour to 27½ cents per hour.

Chippers from 16½-20 cents per hour to 22½ cents per hour.

Laborers from 15 cents per hour to 18½ cents per hour.

For over-time, that is all hours of work exceeding the regular 8 hours working day, the rate should be 50 per cent more for the first two hours and 100 per cent more for each additional hour of extra work. Sunday work was entirely excluded; if proven, however, necessary, double rates per hour should be charged. In addition to this, the adoption of Union shop rules was demanded. A circular containing this scale of wages was sent to the proprietors of the five architectural iron foundries in this city in January, but ignored by them. The strike was declared on the first day of May. The employers state that they already pay higher wages than any similar establishments in Cincinnati, Chicago and other Western places; that they have to compete with these cities, as most of their orders come from outside; that a reduction of the hours of labor would not be acceptable to them, as the moulders and laborers worked ten hours and did not express any wishes as to reduction of time. The proprietors acted in concert, and after six weeks of hard struggle their determination was not weakened in the least. Even a compromise proffered by the strikers to their employers, to grant them the reduction of time without any increase of rate per hour, was unanimously refused. As a lack of discipline and support from other organizations had decimated the ranks of the strikers, they decided to drop their cause as hopeless, and the strike was declared off on June 13, 1891. See table for details:

| Name of establishment.        | No of employees engaged in strike | Duration of strike in work-days | Average wages before strike. | Average wages after strike. | Loss in wages to employees on account of strike. | Loss to employers on account of strike | No. of men who lost positions by strike. | No of new men taking places of strikers | Am't of relief given to strikers by labor organizations |

## MINOR STRIKES OF 1891.

Jan. 6.—In Sherpe and Koken's foundry some 76 men belonging to Architectural Iron Workers' and Chippers' Union, struck because company reduced wages 10 per cent, to which amount wages had been advanced during previous summer. Company agreed, however, to continue paying advanced rate of wages when it was proved to them that their scale of wages was not as high as in other shops in the city. Thereupon, as they could not bring the proof, they had to accede to a reduction of wages, and went back to work after they had been out two days.

Jan. 15—Four compositors (girls) struck in Western News-paper Co.; complaint, low wages, too many working hours and bad treatment. Places were filled immediately by new help.

Jan. 17—Twenty girls, trimmers in St. Louis Wooden Gutter Co., struck because rates for piece-work were reduced. Places filled immediately by other girls.

Feb. 6.—Ben Deering, manager of the Evening Call, notified the compositors that after Feb. 6th all advertising or "fat" matter should be set by the week. For other matter he would pay the regular Union rates, but could not guarantee any definite amount of work per day, as the strictest economy on his part was necessitated by the financial standing of the paper. This being at variance with the established usages prevailing in all newspaper offices (where all composition must be paid for either by the piece or by the week, and further where each compositor must be given work for seven consecutive hours each day that he works), the proposition was laid before and rejected by the officers of the Union. Ben Deering then dispensed with the services of Union men, stating that while he, as a former Union printer, recognized the propriety of the usage, it was impossible for him in the present financial condition of the paper to comply with the rules of the Union. Thereupon the printers quit work and their places were supplied with non-Union men. The number of men that quit was eleven. It is claimed that no loss was sustained by the printers, as they had always more or less trouble in getting their wages. The paper has since ceased to exist. At no time was there any harsh feeling between the proprietor of the paper and the Union.

April 13—Chippers in Mo. Car and Foundry Co. struck for advance in wages, from \$1.40 to \$1.66 $\frac{2}{3}$  per day, or \$10 per week. Demand of the men was complied with, and they went back to work the next day.

April 21—Six teamsters struck in Knapp and Stout lumber yard, because two were dismissed for being drunk. Places of strikers were filled immediately with new men.

About the same time, the lumber pilers demanded and were granted an increase in wages from \$1.25 to \$1.50 per day.

April 3—Foreman of Jacob Kaiser's mattress factory ordered one of the men to make for an invalid boy an extra small sized mattress, 3 feet by 5 and 8 inches thick. The regulation price for a mattress 4½ feet by 6 feet and 6 inches thick being 40 cents, the company thought that 35 cents was a sufficient remuneration for this extra job. The man, however, refused to make it for 35 cents, and demanded the full price of 40 cents. He was told he had to take the work that was given him or he would get no work at all. Then he stepped out and nine men with him. Some of the latter, however, returned the next day; others found their places taken by new men. Five out of nine men lost their positions. Neither employer nor employes sustained any considerable loss, as the locked-out men found work in other establishments within a few days.

May 16—Ten sheet iron workers employed by J. N. Kilpatrick, of the South St. Louis Iron and Foundry company, at the new Carondelet electric and ice plant, struck because their foreman was dismissed for reasons known to Mr. Kilpatrick only, and he refused to reinstate him. Two of the men went to work a few days later. The places of the remainder were filled with new men.

May 1—The team owners of the city who are employed by contractors to remove earth and clay, from excavations, had for years past complained of insufficient pay. They could scarcely average \$2.50 per day, including the team. They began to organize in March, 1890, but up to May 1 of the present year were not strong enough to assert themselves. On May 1, however, they demanded \$4 a day for ten hours' work, and threatened to strike if their demands were not acceded to. All of the members of the Team Owners' Union, No. 5350 of the American Federation of Labor, pledged themselves to carry out to a letter, City ordinance No. 16168, of April 6, 1891, which reads as follows: "All boxes or beds of wagons hereafter used for the removal of earth or clay shall not exceed the following inside dimensions, namely: six feet long, three feet wide and twenty-one inches deep; and the same shall not be filled above water measure, or a uniform level across its top." Under these conditions, the contractors complied at once with the demands of the team owners. Strike was not declared. Only four contractors refused to pay the Union rates.

April 1—The whiteners, who are well organized, sent out to the bosses circulars containing their advanced rates. For an eight hour days' work they demanded \$3, or 37½ cents per hour; for each hour over time, 56½ cents; Sunday work, 75 cents per hour. Thirty-two bosses complied with these demands at once, and their shops were turned into Union shops. In the remaining shops the former rates were maintained. These rates were 35 cents per hour, ten hours constituting a day's work. No strike was declared.

## ST. LOUIS BOYCOTTS.

---

### I. GARMENT CUTTERS AGAINST THE SCHWAB CLOTHING CO.

On December 13, 1890, the firm discharged two of their employes, the Recording Secretary of Labor Assembly No. 993 (garment cutters and trimmers) Knights of Labor and the shop president, the latter having been appointed by the Assembly in order to see that the Union rules were strictly carried out in the cutting department of the above firm. The members of the firm gave as their reason for this summary proceeding, that the two men had interfered with the business and were altogether too meddlesome. The men denied this charge and claimed they had merely done their duty as officers of the Union.

On December 15, the District Executive Board of the K. of L. waited upon the members of the firm, explained the action of the two discharged brothers, and demanded that they should be reinstated until December 17, or until the National Tailors' Assembly No. 231 K. of L. could be notified and requested to take action in this matter. As the firm refused to comply with this demand, the matter was referred to the last mentioned body.

The Master Workman of N. T. A. No. 231 then asked the Schwab Clothing Co. to put the two discharged men back to work at once. The firm replied they had not discharged the men for being officers of the organization; on the contrary, they had always sympathized with and supported all labor movements. They asked the M. W. of N. T. A. No. 231 to come to St. Louis, as they were willing to settle the trouble in an amicable way. The M. W. however, being very much occupied at that time, wrote that he could not come to St. Louis within the next 12 days; the firm, however, if willing to settle, should put the men back to work pending an investigation; within three weeks the matter would be investigated, and then according to their mutual agreement the men would be left in their places or be discharged for good. The firm did not accept this proposition, and was thereupon notified that the N. T. A. No. 231 would take such steps as would be considered necessary to protect their members against any iniquity or unfairness.

The war was declared on January 19. In February last the firm published a statement, defending its action and protesting against such rash steps as the organization had taken.

On May 13, 1891, an agreement was entered into by the Schwab Clothing Co. and N. T. A. No. 231, according to which the firm employs no person who is not a member of the K. of L. and attached to N. T. A. No. 231; it does not discriminate against any one member of the above organization. The N. T. A. No. 231 K. of L. binds itself to take up no grievances until they have been referred to an arbitration committee (composed of two members of said firm, and two members appointed by N. T. A. No. 231, and a fifth outsider selected by a majority of the four). The firm paid all expenses involved by N. T. A. No. 231 during the entire trouble.

#### II. THE MALTSTERS' AND BREWERS' ORGANIZATION AGAINST THE ST. LOUIS BREWERIES.

On March 28, 1886, the brewery workers of this city organized themselves as Brewers' and Maltsters' Union No. 6, National Union of the United Brewery Workers of the United States, being a branch of the American Federation of Labor. On May 15th of the same year, the local Union affiliated with the K. of L. as Gambrinus Assembly No. 7503 K. of L.

The St. Louis Brewers' Association, comprising all breweries in the city but two very small ones, at once vigorously opposed this young organization. The Union, however, offered fight on May 1, 1886, and boycotted Schnaider's and Stifel's beer (the latter was president of the association). In August of the same year, the members of the Association, when they saw that this boycott was effective, decided that by September 4, all employes who had not severed their connection with the Union should be discharged. The Union discussed in an extra meeting this step of the brewery bosses, and unanimously resolved to declare a general strike on September 2, if the bosses should fail to sign the rules of the organization up to that date. The brewers refusing to recognize the Union, the strike was begun on September 2, 1886, and lost a short time after. Lack of discipline and indifference on the part of most of the men accounted for this defeat. The Union immediately resorted to another expedient. In October, all breweries but one (Miller's) were boycotted. This continued until January 6, 1887, when an agreement was entered into between the Association and the Union, which was in effect until May 1, 1888. After that date the Secretary of the Association declared that the St. Louis brewers would no longer recognize organized labor in their establishments. The

Wainwright brewery was first to discharge its Union employes, and a boycott was placed upon its product. In the other breweries, the Union men were not annoyed, but merely taken no notice of.

On June 1, 1889, seventeen St. Louis breweries formed the St. Louis Brewing Association, and its stock was offered on the English market. The Union then placed a boycott on this so-called English syndicate. In the meanwhile, the Central Labor committee had repeatedly waited upon the Lemp and Anheuser-Busch breweries, to induce them to stand by the agreement of January 6, 1887. As these two breweries were determined to disavow the Union, the boycott was placed on their beer also (November 23, 1889). The Obert brewery had recognized the Union ever since January, 1887, and was, up to October 1, 1891, the only Union brewery in the city. The boycott, however, on a great local industry, was not popular with the St. Louis workingmen. The Union had to look for outside help. In December, 1889, the convention of the American Federation of Labor in Boston, and in June, 1890, the General Executive Board of the K. of L., took up the cause of their brother workmen, and indorsed the boycott, but only against Lemp and Anheuser-Busch beer, as these firms could be reached outside the city, doing a large export business. In April, 1891, the breweries constituting the St. Louis Brewers' Association discharged 33 men because they were members of a Union that boycotted the product of these breweries. In consequence of this new hostility, the Union suspended the boycott on the beer of the English syndicate in order to concentrate its forces against Anheuser-Busch and Lemp, especially against the former firm. In June last negotiations were entered into by the Anheuser-Busch Brewing Association with the General Executive Board of the K. of L., and a little later with the American Federation. On September 25, the firm succeeded in bringing about an agreement which was accepted by the G. E. B., and on October 1, by the District Assembly and the local Union. According to this agreement, the Anheuser-Busch Brewing Association recognizes the Union and gives preference to its members in filling vacancies. The boycott against this brewery was raised on October 1, 1891.

### III. THE STOVE MOUNTERS' UNION AGAINST THE BUCK STOVE AND RANGE COMPANY.

On October 4, 1890, the members of the above Union employed in the factory of the Buck Stove and Range company asked for a 16½ per cent increase in the price of their work, as they could not make \$1.50 per day, even if they worked very hard. When the firm refused to accede to the wishes of the men the matter was laid before the Union,

which appointed a committee of three from among the men employed in this shop to wait upon the members of the firm. The manager of the firm, however, sent one of the men right off, and ordered the other two back to work. Thereupon the matter was brought to the knowledge of the District Executive Board of the American Federation of Labor. A joint committee of the A. F. of L., the K. of L. and the German Arbeiter Verband called on the members of the firm, who told them they would not recognize any labor organization, but claimed the right to settle all trouble arising between their firm and their employes without the interference of any outside parties. On October 15, the thirteen members of the Union employed in this factory were ordered out, and a boycott was placed on the product of this firm. Up to October 1, 1891, the trouble was not settled.

#### IV. TROUBLE BETWEEN GERMAN AND AMERICAN TYPOGRAPHIA NO. 3, AND SOME GERMAN NEWSPAPERS OF ST. LOUIS.

Previous to June 24, 1890, the two German evening papers had raised the rate of wages of their compositors to 23 cents per 1,000 letters, in order to settle some other grievances. The Union decided to introduce this rate into all German newspaper offices in the city, and at the same time to enforce the recognition of their organization. On June 24th an extra meeting was called, the matter was discussed, and committees appointed to call on the editors and managers of the different papers. The Westliche Post at once acceded to the demands of the Union; the Amerika, after some delay, refused to do so; the Anzeiger des Westens declined to negotiate with organized labor at all, though the rate of 23 cents per 1,000 letters was afterward paid. All Union men employed in the Amerika and Anzeiger des Westens were ordered to strike, and a boycott was placed on both papers. The Amerika compromised, however, and the boycott was lifted on September 30, 1890. The Anzeiger is apparently determined to maintain its opposition against organized labor. The Union has recently allowed its members to accept positions in this office, though the boycott has not been lifted.

## LABOR AGENCIES.

---

In St. Louis and Kansas City there are thirty so-called labor agents who, for a stated sum, agree to get a working man or woman a position. The amount charged by the labor agent varies from 50 cents to \$20.00, or in proportion to the amount of money the applicant is supposed to have. The working people of the cities are swindled out of more money in this way than perhaps all the other methods put together. The criminal court docket of St. Louis has page after page filled with cases that have been brought against the labor agents by their victims for money paid and no position secured. Each case has been put off from time to time and at last dismissed because prosecuting witness failed to appear. No one who is dependent upon his daily labor for support can afford to wait month after month for the case to be tried. In some instances where the case is nearly ready for trial, and the witness should remain near at hand, he is bought off by the labor agent and the case is dismissed as usual.

Several of the labor agents have their offices in saloons; they advertise in an afternoon paper for fifty or a hundred laborers, who promptly put in an appearance next morning, and after registering and paying \$1.00 (usually the fee charged), they are told to remain near at hand, and that free transportation will be furnished them and they will be shipped out on the evening train. The laborer is feeling happy over having secured a position, and usually has from 50 cents to \$5.00 remaining after paying his registration fee; this money he spends in the labor agent's saloon during the day, and when night comes he is informed that the transportation not having arrived, he will have to wait until morning. In the morning they return and perhaps spend the remainder of the money; they are then informed that the transportation has not arrived, and their registration fee is returned and they depart sadder but wiser men, while the labor agent gives himself credit for from one to two hundred dollars taken in over the bar from his victims.

From an examination of the following tables, the reader can form an idea of the number of applicants for positions during the year, and

the large amount of money paid to the labor agents by that class of working people who are most in need of help.

In Kansas City the labor agents received \$64,464 from 43,672 workmen, at least that is all the labor agents claim they received, when, if the truth was known, they received several times that amount. This \$64,464 was for securing situations for males and was divided among eight labor agents, making the amount \$8,000 each claimed to have received.

Of the four agents securing positions for females \$6,104.50 was paid by 3,835 working women. Three out of the four agents just mentioned secure positions for males and are included in the eight mentioned above.

If a law should be passed, by which the working people of the cities could be saved this large sum, it would meet with general approval. In Ohio, about twelve months since, the legislature passed a law creating free public employment offices in charge of the Bureau of Labor. Free public employment offices were established in the cities of Cincinnati, Cleveland, Columbus, Toledo and Dayton. The excellent results attained are given, which is copied from the Labor Commissioner's report of Ohio:

#### FREE PUBLIC EMPLOYMENT OFFICES.

The following is the full text of the law providing for the creation of "free public employment offices" in the cities of Cincinnati, Cleveland, Columbus Dayton and Toledo:

An act to amend section 808 of the Revised Statutes of Ohio.

SECTION 1. *Be it enacted by the General Assembly of the State of Ohio*, that section 808 of the Revised Statutes be so amended as to read as follows:

Sec. 808. The commissioner shall have an office in the state house which shall be a bureau of statistics of labor, and he shall collect, arrange and systematize all statistics relating to the various branches of labor in the state, and especially those relating to the commercial, industrial, social, educational and sanitary condition of the laboring classes. Said commissioner is hereby authorized and directed, immediately after the passage of this act, to organize and establish in all cities of the first class, and cities of the first and second grade of the second class in the state of Ohio, "a free public employment office," and shall appoint one superintendent for each of said offices to discharge the duties hereinafter set forth. Said superintendent shall cause to be posted in front of their said offices on a sign board, or in a suitable place on the building where such offices are located, the words "free public employment office." It shall be the duty of such superintendents to receive all applications for labor of those desiring employment and those desiring to employ labor, and record their names in a book kept for that purpose, designating opposite the names of each applicant the character of employment, or labor desired, and the address of such applicant. Each of said superintendents shall be provided with such clerical assistance as in the judgment of the commissioner may appear necessary for properly conducting the duties of their several offices. No compensation or fee shall, directly or indirectly, be charged to or received from any person or persons seeking employment or any person or persons desiring to employ labor through any of said offices. Said superintendent shall make a weekly report on Thursday of each week to said commissioner of all persons desiring to employ labor, and the class thereof, and all persons applying for employment through their respective offices, and the character of employment desired by each applicant; also, of all persons securing employment through their respective offices and the character thereof, and a

semi-annual report of the expense of maintaining such offices. Said commissioner shall cause to be printed weekly a list of all applicants and the character of employment desired by them, and of those desiring to employ labor, and the class thereof received by him from the respective offices aforesaid, and cause a true copy of such list on Monday of each week to be mailed to the superintendent of each of said offices in the state, which said list by the superintendent shall be posted immediately on receipt thereof in a conspicuous place in his office, subject to the inspection of all persons desiring employment. Said superintendents shall perform such other duties in the collection of labor statistics as said commissioner shall determine. Any superintendent or clerk as herein provided, who directly or indirectly charges or receives any compensation from any person whomsoever in securing employment, or labor for any other person or persons as provided in this act, shall be deemed guilty of a misdemeanor, and be fined in any sum not exceeding fifty dollars, and imprisoned in the county jail or workhouse not exceeding thirty days. The superintendent of each of said offices shall receive a salary, to be fixed by the council of such city, payable monthly. The clerk or clerks required in any of such offices shall receive a salary of not more than fifty dollars per month, provided the compensation of such superintendents and clerks so appointed shall be paid out of the city treasury, in which such free public employment office may be located.

SEC. 2 That said original section 308 of the Revised Statutes be and the same is hereby repealed.

SEC. 3. This act shall take effect and be in force from and after its passage.

NIAL R. HYSSELL,

Speaker of the House of Representatives.

WILLIAM V. MARQUIS,

President of the Senate.

Passed April 28, 1890.

UNITED STATES OF AMERICA, OHIO, }  
Office of the Secretary of State. }

I, Daniel J. Ryan, Secretary of State of the State of Ohio, do hereby certify that the foregoing is an exemplified copy, carefully compared by me with the original rolls now on file in this office, and in my official custody as Secretary of State, as required by the laws of the State of Ohio, of an act passed by the General Assembly of the State of Ohio, on the twenty-eighth day of April, A. D. 1890.

In testimony whereof, I have hereunto subscribed my name and affixed my official

[SEAL]

seal, at Columbus, the sixth day of May, A. D. 1890.

DANIEL J. RYAN,

Secretary of State.

As the law was passed on the last day of the legislative session, I was compelled to wait until May 6 before obtaining a certified copy from the Secretary of State.

The objects sought to be obtained by the law are good, but the law itself is one of those curiosities which are sometimes born of loosely constructed or hastily considered legislative enactments. The law, it will be observed, both authorized and directed the Commissioner to proceed immediately to organize the "Free Public Employment Offices," and to appoint superintendents and clerks for the same.

To organize the offices necessitated the securing of salaries for those who were to fill them, and as the law provides that salaries shall be paid out of the treasury of the several cities in which the offices are located, yet leaves it optional with said cities as to whether they shall or shall not pay, I sent certified copies of the law to each of the city councils, and, either by letter or in person, asked that that an ordinance be passed fixing salaries of superintendents and clerks. All of the cities complied with my request, although some of them were late in doing so: and Toledo only provides for a superintendent.

The starting of the offices dates from or nearly from the appointments, which were as follows:

Toledo, June 4: Charles W. Murphy, superintendent, salary \$1,000 per year.

Cleveland, June 23: Roger O'Sullivan, superintendent, salary \$1,200; and Miss Edna L. Porter, clerk, salary \$600 per year.

Dayton, June 26: Thomas E. Kane, superintendent, salary \$1,000; and Miss Annie Larkin, clerk, salary \$600 per year.

Cincinnati, July 15: W. J. Stevenson, superintendent, salary \$1,200; and Mrs. B. Lieberman, clerk, salary \$600 per year.

Columbus, August 11: P. J. Elliott, superintendent, salary \$1,200; and on August 22, Miss Nettie Voegle, clerk, salary \$600.

There being no appropriation made by the Legislature for expenses, other than salaries, connected with the "Free Public Employment Offices," and not knowing whether the law contemplated that the State or the cities should defray them, I addressed the following letter to the Attorney-General.

BUREAU OF LABOR STATISTICS, }  
COLUMBUS, O., May 14, 1890. }

Hon. D. K. WATSON, *Attorney-General of Ohio*:

DEAR SIR—I desire to call your attention to section 308 of the Revised Statutes, as amended April 28, 1890, and to ask if, in your opinion, the State must pay all expenses connected with "Free Public Employment Offices," other than that of salaries of the superintendents and clerks.

Respectfully yours,

JOHN MCBRIDE,  
Commissioner.

The following is the Attorney-General's reply:

OFFICE OF THE ATTORNEY-GENERAL, STATE OF OHIO, }  
COLUMBUS, O., June 6, 1890. }

Hon. JOHN MCBRIDE, *Commissioner of Labor Statistics, etc.*:

MY DEAR SIR—You recently submitted to me the following question, and desired my official opinion:

"I desire to call your attention to section 308 of the Revised Statutes, as amended April 28, 1890, and to ask if, in your opinion, the State must pay all expenses connected with 'Free Public Employment Offices,' other than that of salaries of the superintendents and clerks."

I have examined the act to which you refer, and while its provisions are not as plain and positive as they should have been, I am, nevertheless, of the opinion that the spirit of the act requires the State to pay the necessary expenses connected with the establishment of "Free Public Employment Offices," except the salaries of superintendents of such offices, and clerks in the same.

Very truly yours,

DAVID K. WATSON,  
Attorney-General.

Guided by the above opinion of the Attorney-General, I had offices rented and furnished at an actual and estimated expense to the State of \$2,000.

The authority to create a deficiency for the amount named was secured through the following communications:

STATE OF OHIO, BUREAU OF LABOR STATISTICS, }  
COLUMBUS, O., December 18, 1890. }

To the Hon. JAMES E. CAMPBELL, *Governor*, E. W. POE, *Auditor of State*, DAVID K. WATSON, *Attorney-General*, Columbus, Ohio:

GENTLEMEN—I herewith call your attention to an act of the General Assembly passed on the 28th day of April, 1890, amending section 308 of the Revised Statutes. Said amendment provides, among other things, as follows:

"Said Commissioner (meaning the Commissioner of Labor Statistics) is hereby authorized and directed, immediately after the passage of this act, to organize and establish in all cities of the first class, and cities in the first and second grades of the second class, in the State of Ohio, a free public employment office, and shall appoint one superintendent for each of said offices to discharge the duties hereinafter set forth."

It further provides that "the superintendent of each of said offices shall receive a salary to be fixed by the city council of such cities."

The other expenses, such as fixtures, rent, postage, etc., is to be paid (according to an opinion heretofore rendered by the Attorney-General) by the State.

I desire to inform you that no appropriation has been made by the General Assembly for defraying such expenses as will be necessary in the enforcement and carrying out of this law. I, therefore, request that under section 3 of the act of March 11, 1889 (Ohio Laws, vol. 88, p. 77), under

the provision authorizing "the expending of money not specially provided for by law," you advise and consent that I may incur a liability and create a deficiency for the above purpose not to exceed the sum at this time of \$2,000.

Respectfully yours,

JOHN MCBRIDE,

Commissioner of Labor Statistics.

COLUMBUS, O., December 18, 1890.

Hon. JOHN MCBRIDE, *Commissioner of Labor Statistics:*

SIR—It having been represented to us by the foregoing communication that it is necessary for you to create a deficiency to the extent of \$2,000 to be used for defraying expenses absolutely necessary to be incurred in your department, we hereby grant you the authority to create such a deficiency.

JAMES E. CAMPBELL, Governor.

E. W. FOX, Auditor of State.

DAVID K. WATSON, Attorney-General.

In making appointments, I selected men for superintendents and ladies for clerks. This was done because of the belief that women and girls out of work would prefer to approach one of their own sex when in search of employment. The wisdom of this course has since been demonstrated by the operation of the offices.

As the law now stands, the Commissioner has the power to appoint but has no authority to remove the superintendents and clerks. This evidently was an oversight, but it should be remedied, so that the good work of the different offices may not be interfered with by the bad services of an appointee. Another bad feature of the law is that which leaves it optional with councils of the different cities to make and unmake salaries. This provision endangers the existence of the offices, and has a tendency to bring the superintendents and clerks into collusion with members of the city governments as against the Commissioner.

During the short time that the "Free Public Employment Offices" have been in operation, the superintendents have rendered material assistance to this Bureau in the way of collecting statistics; yet, if the employment offices are to continue as auxiliaries to the Bureau, the State should either assume all expense in connection with the offices, or make it obligatory upon the city governments to do so.

The superintendents of the "Free Public Employment Offices" are required by law to report to this Bureau on Thursday of each week the work done by them during the preceding week.

The reports commence with the appointment of superintendents, and are here given as reported weekly.

"Situations wanted," means those wanting work to do.

"Help wanted," refers to employers wanting employees.

"Positions secured," indicates the number who have secured work through the offices.

| <b>Totals.....</b>       |  | <b>1965</b>        | <b>710</b> | <b>1192</b>  | <b>722</b> | <b>684</b>         | <b>525</b> |

The total number of persons wanting situations was 20,136, and of this number 14,529 were males and 5,607 females.

The total number of employes wanted by employers was 18,154, and of this number 11,453 were males and 6,701 females.

The total number of persons having secured situations through the offices was 8,992, and of this number 5,575 were males and 3,407 females.

The amount of "help wanted" was 90.2 per cent of "situations wanted."

"Positions secured" was 49½ per cent of "help wanted."

"Positions secured" was 44.6 per cent of "situations wanted."

From the fact that offices had to be rented and furnished, and that there was no money for advertising purposes, the work done by the "free public employment offices" during the short time reported is creditable alike to the officials in charge of the offices and to the state.

The entire cost connected with the offices up to January, 1891, will not exceed \$5,000.

If the 8,982 persons who secured work through the "free public employment offices" had obtained employment through the private employment agencies, it is fair to assume that the cost of such services would have averaged \$3 per capita for males and \$1 for females, or a total of \$20,132, and by deducting from the latter sum the cost of maintaining the "free public employment offices" there is a balance of \$15,132, which has been saved to the willing yet poor and needy working men and women by the state law.

This saving in dollars and cents may appear large in the eyes of those not familiar with the patronage given to employment agencies, but as there are at least twelve well-known private employment agencies now running in the cities in which the "free" offices are located, and as many more scattered over the smaller cities of the State, it is evident that nearly one hundred persons live and thrive through the profits derived from such private agencies. This would indicate that nearly one hundred thousand dollars is annually spent by working men and women in efforts to secure employment through the assistance of employing agencies, and if this sum can be saved to the honest toilers of Ohio by the expenditure of about ten thousand dollars annually on part of the State for the maintaining of "Free Public Employment Offices," that will be run by officials obligated to make honest and energetic efforts to furnish help to employers of labor, and to aid idle labor in securing honorable employment, it should be done.

The "Free Public Employment Offices" have proved an excellent thing in Ohio, and your Commissioner is of the opinion, should such a law be passed in Missouri, the results would be equally as good. An office of this kind located at St. Louis and Kansas City could be run at an expense of not exceeding \$2,500 a year each, and would not only be the means of saving the working people a great many thousand dollars per year, but would furnish them with information that could be relied upon. The following gives details in regard to the labor agents of St. Louis and Kansas City:

## ST. LOUIS.

## LABOR AGENCIES FOR MEN.

George A. Lewis is the owner of the labor agency at 319 south Market street. The room called office is in the rear of a saloon, the latter of the kind and description that are usually frequented by laborers alone.

The agent states that he has some 500 applications a week from laborers for all kinds of work, mostly, however, for railroad and quarry work. He is able to secure work for some 50 men a week.

Employers, as a rule, are not charged for being supplied with laborers. All charges are laid on the men who apply and are provided with work. Charges are \$1 and \$2.

Agent has been in business in the present place for eleven years. He claims that he conducts his business in a fair, honest way. There is entered in the books of the Court of Criminal Correction, under date of September 27, 1890, the following charge :

"That George A. Lewis, on the 22d day of September, 1890, did unlawfully and feloniously, with intent to cheat and defraud, obtain from William Camp seven dollars lawful money of the United States, by means and by use of a false and fraudulent representation, pretense and statement, and by use of a false and bogus order. On October 8, of the same year, case was laid over to October 22, and from that latter date to October 24 ; on which day court had to dismiss the case for want of prosecution."

Lewis states that he obtained \$7 from the said Camp—\$1.50 being his fee and \$5.50 the railroad fare. The man was hired to do general work, and afterward he demanded of the contractor a position as cook, which he did not obtain. Thereupon he returned to the agent and demanded his money back. When this was refused, he swore out a warrant charging Lewis with fraud. The police say that this charge could have been sustained, but that plaintiff, who had no means, could not wait in the city until trial.

The location of the agency is decidedly objectionable. The proprietor claims that some 500 men per week, or 26,000 per year, apply at his office for work. All these men have to pass through his saloon. It is suggested by reliable persons that the saloon business is the principal and most profitable business done by the agent ; that he advertised for laborers when he had no orders to fill ; that he made the men believe that he had work for them in order to gather them around his

bar and cause them, to spend part or all of the little money they had. This matter was carefully looked into. The advertisement of this agent is almost continuously in the daily papers, but the form of the same changes every day.

On July 16, two men complained at the Four Courts that five of them had been sent down to Bonne Terre to do railroad work, had paid \$1.50 each to the agent, partly as fee, partly to defray railroad transportation, and when they arrived there the contractor declared that he had given no orders to Lewis to send any men. A most careful investigation could not bring to light any fact to corroborate this statement of the two laborers. Lewis produced the letter from John Scott & Son ordering him to send them 20 laborers. The letter was dated July 1, 1891.

The prosecuting attorney of the Court of Criminal Correction, Mr. Estep, stated that during the last six months, some 50 cases had come to his knowledge, where men complained against Lewis. But as a rule, the men had not the means to stay in the city and prosecute the agent. Mr. Estep could not run the city to expense only to see the cases afterward dismissed for want of prosecution.

H. P. Thiele keeps an agency at 321 Walnut street. He states that he has some 600 applications a week from laborers, and is able to secure work for some 100 per week. Employers are charged nothing for being supplied with laborers. For laborers supplied with work, the charge is \$1; 50 cents to \$1 extra pay is asked when laborers are shipped through other agencies. In most cases the railroad fare is paid by the contractor or railroad that employes the men. But when laborers are plentiful, transportation is charged the men.

This agency is not connected with a saloon. The agent has been established in this business for six years. He states that he has never had any trouble with the courts, that he transacts his business in a fair and honest way. There is entered in the Court of Criminal Correction of this city, a charge against H. P. Thiele of date May 7, 1891, reading as follows:

"H. P. Thiele on the 7th day of May, 1891, unlawfully and willfully did agree and promise and advertise through the public press to furnish employment and situations to certain persons, and in pursuance of such advertisement, agreement and promise, did unlawfully and willfully receive a sum of money, to wit, *twenty* dollars, from one Thomas Berlin, and did unlawfully and willfully fail to procure for said Thomas Berlin an acceptable situation and employment, and did unlawfully and willfully fail and refuse to return the said twenty dollars to said Berlin after said Berlin demanded the same."

Court decision on June 23 inst.:

"Defendant pleads not guilty. Tried by court. Defendant adjudged guilty; sentenced to pay a fine of \$50 and costs. Motion filed for a new trial was overruled on July 26th. Defendant paid back to two of his victims—namely, Thomas Berlin and John Eagel—the unlawfully obtained money (\$20), and execution was stayed on promise of good conduct."

The number of victims in this case was five—Thomas Berlin, John Eagel, John Compton, Henry Roper, Wm. Lawcer—each of whom had paid to the agent the sum of twenty dollars. Two of the men were not able to reach the city and prosecute the agent. Three cases were brought before the court, one of which had to be dismissed for want of prosecution.

William A. Mara keeps a railroad labor agency at 612 Walnut street. He states that some 500 men per week, on an average, apply for work, and that he is able to secure work for some 100 per week.

Charges to the men for whom work is provided, from \$1 to \$2.

Has been established for sixteen years, and has had no trouble with the police or the court on account of the way in which he carries on his business. Inquiries about this place did not reveal any facts that would contradict the agent's statements.

Jerry Dignan keeps an agency at 1206 N. Broadway. His office is on the ground floor of a large boarding-house for workingmen, and in the rear of a saloon. He is not the proprietor of either the boarding-house or saloon, but rents part of the saloon for his office.

This agent states that he has some 300 to 400 applications per week for work, and furnishes employment for some 100 on an average per week. Charges are strictly \$1 for the workingmen.

Careful inquiries could not detect any crooked business transaction. At the police headquarters, the name of Dignan had not been heard in connection with complaints from laborers.

There are two more agencies in the city—Price Murray's, at No. 5 S. Sixth street, and Conley's, at 1001 N. Broadway. Both places do a very limited business, not averaging more than 25 men per week supplied with work. The last named place is connected with a saloon.

The following table shows details of the business done by labor agencies in St. Louis:

| Name of agent.     | Average number of applications for work..... | Average number of cases where work is secured ..... | Charges for securing work.. | Total amount made in a year |
|--------------------|----------------------------------------------|-----------------------------------------------------|-----------------------------|-----------------------------|
| Wm. A. Mara.....   | 26,000                                       | 5,200                                               | \$1 to \$2                  | \$7,800 00                  |
| Geo. A. Lewis..... | 26,000                                       | 2,600                                               | 1 to 2                      | 4,500 00                    |
| H. P. Thiele.....  | 31,200                                       | 5,200                                               | 1 to 2                      | 7,800 00                    |
| Jerry Dignan.....  | 15,600                                       | 5,200                                               | 1                           | 5,200 00                    |
| Price Murray.....  | 2,600                                        | 1,300                                               | 1                           | 1,300 00                    |
| Conley.....        | 5,200                                        | 1,300                                               | 1 to 2                      | 2,250 00                    |
| Total.....         | 106,600                                      | 20,800                                              | 1 to 2                      | 30,400 00                   |

But these figures are far from being reliable. The agents hunted for years by the police and detectives, who have been trying to get a case against them, have become extremely suspicious. A simple official investigation, therefore, will not suffice to bring to light any new facts. As to the real business done by the agencies, it can be safely said that the figures in the table above represent only 40 per cent of the exact business done. It must furthermore be stated that when a contractor sends an order for 50 men, say, at least 80 or 100 are sent to his camp.

#### EMPLOYMENT AGENCIES FOR TYPE-WRITERS AND STENOGRAPHERS.

There are four employment agencies in this city for type-writers and stenographers. Only three of these, however, are regular employment bureaus, and with all but one, the employment bureau is an outcome of the real business of selling type-writing machines.

Wycoff, Seamans & Benedict, 308 N. 6th street, do a big business in selling type-writers, and incidentally serve as an employment agency. They never charge for such services, nor do they charge any one for practicing on their type-writers. The person in charge of the business being acquainted with the needs of the employer who comes here to purchase a machine, and the one who desires to be employed, who comes here to practice on a machine, makes them acquainted with each other, and in this way they serve as an employment agency.

Parker & Ritter, 3rd and Locust street, carry on an employment agency in connection with their other business. They charge nothing for practicing on their type-writers, but usually charge 30 per cent on first month's salary to those obtaining positions through their agency.

Number of applicants per month for positions average..... 25  
 Number of positions per month provided for applicants..... 5

The St. Louis Type-writers' Exchange, 710 Olive street, has been established for one year. Charges are \$10 per month for use of type-writer, together with drilling in short-hand writing, and for position provided, half of first month's salary.

The information given above was obtained from persons who had made application to this exchange for positions. The manager of the bureau refused to give any information whatever, which refusal prevents our stating the number of applicants during the year and the number of positions provided.

Following is a copy of blank to be filled out by person obtaining position :

St. Louis, Mo.....1891.

I hereby agree to pay to the St. Louis Type-writer Exchange, or any of their authorized agents, one-half of my first month's salary derived from any position that I may secure through their influence or information—said commission payable at their office, 710 Olive St., without further notice or demand, as soon as earned by me.

## RULES.

1. Only thoroughly competent and experienced stenographers are invited to register.
2. Each member of this Association is required to report promptly when referred to a position, and to consider all matters reported to them as strictly confidential.

## TERMS.

We charge for our services, 40 per cent of the first month's salary, payable in two equal payments, thirty and sixty days from date position is secured. For a temporary position (less than one month), our fee is 10 per cent of the amount earned in said position.

## AGREEMENT.

I do hereby agree to obey the above rules; also, to make payments when due, and as above indicated' in case I secure a position through said Association.

Signature.....

Date.....

The hours of stenographers in commercial houses are from 8 to 6.

Hours of stenographers in railroad offices, 8:30 to 5:30.

Hours of stenographers in law offices, 9 to 5.

Salaries of stenographers range from \$5.00 to \$25.00 per week—those of course having the most experience and being in every other way the most competent, receiving the highest salaries.

## FEMALE EMPLOYMENT OFFICES FOR DOMESTICS.

On account of the great number of factories employing female labor, domestics are difficult to obtain, and the demand for domestics is three and four times as great as the supply.

In regard to the factories: As soon as a girl is old enough to do anything to help her family, she is sent to some factory to work. Her wages may be very small, but where there are several or more in a family contributing toward the general support, every little helps. "Once a factory girl, always," is now accepted as almost a truth, because, even should the factory girl ever desire to do household work,

her ignorance of such work and her utter lack of home training render her unfit to engage in household work, either to her own satisfaction or that of her employer.

But it is seldom that a factory girl has any desire to exchange the factory work for household work. She loves freedom. She knows that she can stop working at a certain time, and that the remainder of the evening is hers; for that length of time she is free. On Sundays, too, she is free.

The wages of domestics in this city are very good—\$6, \$8, \$10, \$12, \$14, \$15, \$16 and \$18, respectively, for nurse girls, general housework, dining-room work, chamber work, etc.; and for competent cooks, \$18 and \$20, and sometimes \$25 per month, with board and room.

Aside from those employment agencies that are connected with the different institutions in this city, there are, as far as can be ascertained, only ten employment agencies for domestics. Formerly, before factories were so numerous, there were three or four times as many, and all doing a brisk business. Now, half as many as at present exist would be able to do the whole business.

Board at \$2.50, \$3.00 and \$3.50 per week is provided by most of the employment people for those who are waiting for situations.

Gibbons' Employment Bureau, 1519 Pine street, established in St. Louis for 1½ months. During these 1½ months there have been 150 orders for domestics, out of which number 100 orders have been filled.

The manager of this bureau obtains his supply of domestics by advertising in country newspapers—each weekly issue bringing him an average of five answers. For office positions, one advertisement for office work would bring 50 answers.

The domestics obtaining positions through this bureau are charged 25 cents.

The employer is charged \$1.00, which being good for six months, entitles the employer to six vacancies (if required) filled during that period without further charge.

Mrs. Mueller, of 1408 Wash street, and Mrs. Kennedy, of 2620 Olive street, both refused to give any information relating to their respective employment agencies.

Mrs. Krenshaw, of 3135 Franklin avenue, has been established for five years, but expects to sell out soon. Does not advertise for her domestics, but after getting one from some country town, depends upon this girl telling her friends about this employment office, and in this way obtains her supply.

As many as twenty orders per week are received for domestics, but only ten or twelve domestics apply per week for situations. Mrs. Krenshaw has her regular customers whom she supplies at irregular intervals, these intervals depending upon the length of time they may be able to keep their help.

The domestics are charged nothing for situations provided them; their employers are charged \$1.

Mrs. Hardy, of 2607 Morgan street, has been established in the employment business for a number of years. Most of her women are veteran domestics from the city, those who are trying to better themselves by changing employers.

Mrs. Hardy says that she charges her patrons whatever she can get out of them—from \$2 to \$5, and the domestics whatever they please to give—from 50 cents to \$2.

This office receives about fifty orders per week and fills about twenty per week.

Mrs. E. Krause, 1116 Chestnut street, has one of the oldest established employment agencies in the city. She advertises in numerous papers, country as well as city. Charges the domestics \$1, and her patrons \$2 if they live in the city, and more if they live out of town.

There are twelve ladies applying for domestics to every domestic desiring a place. Mrs. Krause fills twenty-five orders per week.

Mrs. Wendermuth, 831 S. 6th street, has been in the business for 16 years. For 14 years was located at 740 S. 7th street.

She has three times as many orders as there are women to fill them. Has 30 and 40 women per month applying for situations where she formerly had 120 and 160. Charges the ladies \$2 and the domestics nothing.

Mrs. Wendermuth advertises in the country papers, but can't keep up with the demand. Hundreds of factory girls pass her door every day, but none apply for situations in families.

Mrs. Jacob Christ, 1615 Park avenue, has been in the employment business for 16 years. She advertises for domestics in country papers, and corresponds with postmasters in little country towns. Charges the ladies \$2 and the domestics nothing. Has 10 orders for domestics every day and can't fill 20 orders per month.

Mrs. Gross, 630 S. Broadway, has been established for some time, but can no longer make her living at this business. Charges her patrons from \$2 to \$5 and the domestics \$1. Can't give any statement in figures as to the number of orders she receives or fills. Has her regular customers.

Lewis Employment Co., 319 Market street, has had a female department only for a short time. Charge the patron \$1 and applicants for situations 50 cents. Twenty to 25 females per week apply for situations, of which number some make application for factory work and others are girls who desire to work in doctors' and dentists' offices.

Receive 6 and 7 orders per day. Office girls get \$4 and \$5 per week.

The Cooks' Union is a secret organization numbering 130 members. The object of this Union is to elevate labor and fix the hours of work. They wish to make eligible for situations only apprentices or those who are trained cooks. They require that a cook who is kept at work until 9 o'clock at night be allowed two hours to herself sometime during the day. They also desire to induce their employers to treat them with some consideration and make pleasant homes for them.

Following is table showing extent of business done by seven out of ten of the employment agencies for women.

The agents always charge the employers something, rates ranging from \$1 to \$5, and sometimes \$10, besides incidental expenses:

| Name of agency.       | Average No. of applicants per week for work. | Estimated No. during the year. | No. of places secured applicants for year. | Average charges for places secured..... | Average amount of fees collected by agent during year from domestics..... |
|-----------------------|----------------------------------------------|--------------------------------|--------------------------------------------|-----------------------------------------|---------------------------------------------------------------------------|
| Gibbon.....           | 24                                           | 1,248                          | 832                                        | 25                                      | \$208 00                                                                  |
| Mrs. Kenshaw .....    | 11                                           | 572                            | 572                                        | .....                                   | .....                                                                     |
| Mrs. Hardy.....       | 20                                           | 1,040                          | 1,040                                      | 50c to \$2 00                           | 1,300 00                                                                  |
| Mrs. Krause .....     | 25                                           | 1,300                          | 1,300                                      | 1 00                                    | 1,300 00                                                                  |
| Mrs. Wendermuth ..... | 8                                            | 416                            | 416                                        | .....                                   | .....                                                                     |
| Mrs. J. Christ.....   | 5                                            | 260                            | 260                                        | .....                                   | .....                                                                     |

|                       | 116                                          | 6,032                          | 5,628                                      | 75                                      | \$3,198 00                                                                |

The different amounts given in table above do not represent the total amounts collected by the different agents from employes, as there are sometimes incidental expenses charged those securing employment.

## KANSAS CITY.

## EMPLOYMENT AGENCIES FOR MEN.

In Kansas City there are three employment agencies that provide employment for both men and women, and six for men alone. Five out of these six, all situated on Union avenue, are in saloons. The male employment agencies, particularly those on Union avenue, have a very bad reputation. Charges are continually being made against them by poor men who have been promised places which they never got, and cheated out of their last cent.

The demand in these offices seems greatest for laborers to work on railroad lines south, west and northwest of Kansas City. Next in demand are hotel help, train agents and farm hands, and, least of all, for those who do clerical work.

The supply of men for all kinds of work, however, is greatly in excess of the demand, the employment agents to the contrary. These agents state that they receive more orders for railroad laborers than they can get men to fill them.

Quite a number of those seeking employment are Kansas City men who have been thrown out of work on account of the present dull times prevailing in the city. But besides the citizens of Kansas City, there is usually a floating population consisting of men from the East, West and Northwest—all of whom are seeking employment. Those from the East have come here thinking they could better their condition, while those from the West and Northwest are returning to the East, having discovered that they could not improve their condition. Many in this way get stranded here, some having spent their last dollar in registering for work in one or more employment offices. Thousands of working men who came to this city during the "boom" and made it their home as long as there was work to do, have left the city within the last two years, and there are many others who can't get away.

All who make application for work are required upon registering to pay a fee, besides which there are usually incidental expenses charged those securing employment. The incidental expenses can be made to amount to considerable. Only about half the number applying for work are able to pay the fee and register.

Following are statements given by employment agents :

Wages for train agents are commissions usually of 20 per cent on sales. Agent is required to leave with employer value of goods in cash, which is returned employe upon quitting service.

|                                                         |                           |
|---------------------------------------------------------|---------------------------|
| Salaries of hotel clerks range from .....               | \$25 to \$50 per month.   |
| For which is charged \$2 registration fee.              |                           |
| Salaries of grocery clerks .....                        | \$6 to \$12 per week.     |
| For which is charged \$2 fee.                           |                           |
| Salaries of hotel stewards.....                         | \$50 to \$100 per month.  |
| For which is charged \$2 fee.                           |                           |
| Salaries of head cooks.....                             | \$35 to \$150 per month.  |
| For which is charged from \$1 to \$5 fee.               |                           |
| Salaries of pastry cooks.....                           | \$25 to \$100 per month.  |
| For which is charged from \$1 to \$5 fee.               |                           |
| Wages of grooms.....                                    | \$35 to \$50 per month.   |
| For which is charged from \$1 to \$2 fee.               |                           |
| Wages of teamsters.....                                 | \$20 per month.           |
| For which is charged \$1 fee.                           |                           |
| Wages of coachmen.....                                  | \$25 to \$30 per month.   |
| For which is charged \$1 fee.                           |                           |
| Wages of farm hands.....                                | \$20 per month.           |
| For which is charged \$1 fee.                           |                           |
| Wages of ranch and cattle men.....                      | \$20 per month.           |
| For which is charged \$1 fee.                           |                           |
| Wages of camp cooks.....                                | \$30 per month.           |
| For which is charged \$1 fee.                           |                           |
| Wages of dish-washers.....                              | \$15 to \$20 per month.   |
| For which is charged \$1 fee.                           |                           |
| Wages of bar-keepers.....                               | \$20 per month.           |
| For which is charged \$1 fee.                           |                           |
| Wages of laborers.....                                  | \$1.25 to \$1.50 per day. |
| For which is charged \$1 fee.                           |                           |
| Free transportation is usually given railroad laborers. |                           |

The Canadian Employment Agency, 923 Main street, has been established in this city for three years or more, and secures employment for both men and women.

"Applicants for work in the male department average from 22 to 25 per week, half of whom do not register and pay the fee.

"One-third of the whole number applying for work are applicants for clerical positions.

"Total number of orders per week range from 75 to 87.

"Out of the 15 per week applying for other than clerical work, between 13 and 14 are provided with places.

"Out of the 8 per week applying for clerical work, between 3 and 4 per month obtain positions.

"Most of the employment obtained for applicants is for places outside of the city.

"Registration fee is from \$1 to \$5 (according to amount of salary expected), which fee entitles applicant to use of office and its privileges for a period of 15 days. Also there are charges for incidental expenses."

The Kansar City Employment Bureau, or Madam Wright's, 910 Main street, has been established in this city for five years or more. This agency secures employment for both men and women.

According to statements made by the man and woman in charge, the number of men per day applying for work are from 5 to 40, and half the number making application are provided with employment. Most of the places provided are in hotels and restaurants, many of them outside of the city on railroad lines.

Rarely any clerical positions are secured by this agency, though plenty of applicants for the same.

Registration fee, \$1 to \$5, which is rated according to amount of expected wages. Incidental expenses also considered.

The Austin Employment Agency, 526 Main street, has been established for about five years. This agency also provides employment for both men and women, but pays the most attention to men.

"During nine months of the year, 300 men per week apply for employment, and two-thirds of these are laborers.

"From 60 to 100 per month consist of men seeking clerical work or employment in hotels and on farms and ranches. At present, many of these are Kansas City men, others are from the East and the West. About 165 per year of these applicants are provided with employment. Only half the number of orders received for laborers are filled. During the year, places were provided for about 900 men, most of whom were laborers.

"One dollar and five per cent on first month's salary are the charges for those seeking work. Also charges for incidental expenses."

Clark's Employment Agency, 9 W. Fifth street, was established in this city some fourteen years ago. Places are provided by this agency for men alone.

"About 50 men per day, and most of these laborers, apply for places. Twenty men per month apply for employment as grocery and dry goods clerks, hotel help, etc.

"Fifty places per month are provided for applicants in the city, and about the same number for outside points. Very few places are provided for those seeking clerical work.

"Charges are from \$1 to \$3 for registering; the rate charged varies according to amount of wages expected. Also charges for incidental expenses."

## EMPLOYMENT AGENCIES ON UNION AVENUE.

The Hopkins Agency, 1010 Union avenue, is for railroad laborers only.

"Can't get all the men they want. Orders are filled for from 100 to 150 men per week. Charges are \$1 for places secured."

G. W. Long, 1008 Union avenue, is an employment agency for laborers only. Established seven years ago.

One hundred to three hundred orders per week filled, and most of these for outside places.

Charges for places secured, \$1.

Lacey's Labor Agency, 1004 Union avenue, established for ten years, is an agency for laborers only.

From July to December, from 100 to 300 men per week secure employment.

Charges are \$1.

W. E Austin & Co., 920 Union avenue, a branch of the employment agency of the same name on Main street. See figures given at main office.

Payne & Co., 918 Union avenue, an agency for laborers. Have railroad orders for more men than they can get. Fill from 75 to 200 orders per week. Charge \$1 for place secured

These agencies on Union avenue, together with the one on W. Fifth street, may be all classed together as the worst places in town, where hundreds of men claim they are swindled.

Following is table showing the figures given by the employment agents in Kansas City:

| Name of agency.     | Average number of applicants per week for employment .. | Estimated number for year.... | Number of places secured applicants for year.. | Average charges for places secured..... | Average amount collected in fees by agents during the year ..... |
|---------------------|---------------------------------------------------------|-------------------------------|------------------------------------------------|-----------------------------------------|------------------------------------------------------------------|
| Canadian.....       | 25                                                      | 1,300                         | 764                                            | \$3 00                                  | \$2,292                                                          |

\* 800 per week for 9 months of the year.

† The agents state that they charge \$1 fee, but they have been known to charge \$5 and more, and they all manage to make out quite a large bill for incidental expenses. If all these extra expenses were added to the usual fee, the total amount collected from working men by employment agencies during the year would double or treble the total amount given above.

#### EMPLOYMENT AGENCIES FOR WOMEN.

In Kansas City there is one employment agency for women exclusively, and three for both men and women; the remainder are for men alone.

With the exception of the one for women exclusively, they all have a reputation not the best in the world for veracity and conscientiousness.

Many of the women applying for work are sent to houses of ill repute. By one employment agency this is said to be done knowingly, but without the knowledge of the women who are thus disposed of; while with the others it is supposed to be done unwittingly. These other agencies profess to being careful not to send them to places of ill repute that are known to be such by the public in general; but with the exception of the one mentioned, none of these employment agencies will risk losing a single fee by bothering to inquire into the character of the people to whom they send the women who apply to them for work.

From the figures given by the employment agents, it would seem that the supply of girls is greatly in excess of the demand. And yet,

there is the same old cry, among those requiring help, that it is a difficult matter to obtain competent help. There is quantity, but as usual, not quality. Incompetency among those applying for work is the rule, the affliction of all housekeepers. As one girl explained matters, "It is not hard for girls to get places nor for ladies to get girls; but the trouble is for the girls to please the ladies and the ladies to please the girls." The requirements of domestics are numerous: they want to do only a certain part of the work; they are very particular as to the distance of the house from the business part of town, as to the size of the family, the style of the house, whether modern built or otherwise, etc., etc.

Owing to hard times now prevailing in Kansas City, many ladies who formerly kept two and three domestics are now getting along with only one; and some who required one domestic are now compelled to do their own work.

The greatest demand is for hotel help, much of which is provided for outside points as far south as Mexico, and westward to California. Some of the agencies supply all the help required in the hotels and restaurants along certain railroad lines.

Among the domestics who have worked in some of the largest and best hotels in the city, is a general complaint of the quality of the food they are compelled to eat, as well as the places they have to eat it in.

Excepting occasionally for dry goods clerks, there is no demand for other than domestics, but there are a few applicants for clerical positions. The short-hand colleges and type-writing agencies of Kansas City supply all the stenographers that are in demand.

All nationalities are represented among those applying for work, but the Irish predominate. Many domestics come from the East, expecting better wages in the West. Others are from the surrounding country. A few are factory girls who are out of employment.

Wages of domestics in the city range at \$2.50, \$3, \$3.50, \$4, \$5 and \$6 per week. The highest wages are paid to cooks. Head cooks average \$5 per week; \$3.50 is the average for general house-work. For places outside of the city, wages are \$2.50, \$3.50, \$4, \$5, \$6, \$7 and \$8 per week. The highest wages are paid to cooks on ranches and in hotels. In Montana, head waiters in hotels have received as high as \$50 and \$60 per month.

Miss Sherwood's Employment Agency, 814 McGee street, is the oldest established agency in this city, and is for women exclusively.

From forty to fifty applicants per day for work, and about thirty orders per day for domestics. About thirty orders per week are filled, half of which are for outside points.

Charges to employer as well as to domestics, \$1 or more, together with incidental expenses—charges depending upon distance from the city and amount of trouble incurred by agent.

The Canadian Employment Agency, 910 Main street, has been established for about three years.

Number of applicants per week for work 35, all of whom are domestics. Only half this number register and pay their fee. About 30 orders per week for domestics, and 16 orders per week filled. Unless the supply registered falls below the demand, only those who have registered are considered when filling the orders. More than half the orders are from places outside of the city.

Registration fee of 50 cents to \$1, together with incidental expenses, charged applicant for situation. The fee must be paid in advance upon registering, "which entitles applicant to use of this office and its facilities for procuring situations for a period of fifteen days."

A registration fee of \$1 or more, together with incidental expenses, is charged employers for help, "for which we agree to keep them supplied with help for thirty days from date of registry."

The Austin Agency, 526 Main street, has been established for about five years. Sixty to seventy women per week during nine months of the year apply for situations, and most of these are domestics. From 16 to 18 orders per week for domestics, and the same number of orders filled.

Employers are charged \$1, domestics 50 cents for registering. Incidental expenses are always considered.

The Kansas City, or Madam Wright's Employment Agency, 910 Main street, has been established for five or six years.

According to statements given at this place, from twenty to thirty domestics per day, and sometimes not half that number per week, apply for work.

From ten to twenty orders per day for domestics, and sometimes only that many per week.

From ten to twenty orders per week are filled.

Charges to domestics, from 50 cents to \$1 and more, together with incidental expenses. Charges vary according to wages received and distance from city.

Charges to employers, \$1 and more, according to distance from town, etc., together with incidentals.

Hotel and restaurant keepers are not charged for help provided them, only for incidentals.

The Y. W. C. A. and the Woman's Exchange have employment bureaus connected with their work for women, but as they are trying to benefit the women and not themselves, they do not desire to be classed with the other employment agencies.

Occasionally, women who are strangers in the city and just arrived at the depot, will, in their ignorance, apply for work at the employment agencies opposite the depot on Union avenue. Great are the dangers that these ignorant women encounter in trusting themselves to the guidance of some of these agents, whose reputations are far from good. Reports of the fate of some of these women are terrible if true.

Following is table with figures given by the agents, showing amount of business done by the employment bureaus for women.

All these agents charge the employers as well as the employes a fee, which ranges from \$1 to \$5, together with incidental expenses:

| Name of agency.      | Average No. of applicants per week for work.. | Estimated number during the year..... | Number of places secured applicants for year.. | Average charges for places secured..... | Average amount in fees collected by agent during the year..... |
|----------------------|-----------------------------------------------|---------------------------------------|------------------------------------------------|-----------------------------------------|----------------------------------------------------------------|
| Miss Sherwood's..... | 270                                           | 14,040                                | 1,560                                          | \$2 00                                  | \$3,120 00                                                     |

| Wright's.....        | 83                                            | 4,316                                 | 780                                            | 2 60                                    | 2,028 00                                                       |
| Total.....           | 453                                           | 22,711                                | 3,835                                          | \$1 46+                                 | \$6,103 50                                                     |

Miss Sherwood's receipts are not really as shown by the figures, as one domestic may try three or four places in one week before she is satisfied, but pays only one fee. This is also true of the other agencies, though should the incidentals that these others charge be added to the figures given above, the total amount collected by them from domestics would be increased considerably.

Leaving out Miss Sherwood, these employment agents have been known to keep the fee whether or not the domestics were provided with places.

\* 65 per week during nine months of the year.

**EMPLOYMENT AGENCIES FOR STENOGRAPHERS.**

In Kansas City there are apparently no regular employment agencies for stenographers. But positions are provided by the type-writing agents for applicants who use their machines, and also by the shorthand colleges for pupils who have graduated therefrom. As far as can be ascertained, no charges are made for these services.

In Kansas City there are about 800 stenographers holding positions, seventy-five per cent of whom are women. In the shorthand colleges, seventy-five per cent of the pupils, too, are women.

The demand for lady stenographers and the supply are about the same, but the demand for men stenographers is always greater than the supply; that is, when there is any demand at all.

From figures given by the five type-writing agencies, the total number of applicants per month would average 100, and about 67 per cent of those applying for positions are placed; 75 per cent of the applicants are women.

Out of about 488 shorthand pupils graduating during the past year, from 80 to 90 per cent obtained positions. All of these, however, were not placed in the city; probably 20 per cent of those obtaining positions were placed outside of the city.

**ADVERTISEMENTS.****"HELP WANTED."—"SITUATIONS WANTED."**

The want advertisements in the daily papers of the large cities furnish some insight into the "supply of" and "demand for" labor. An investigation of this kind has been carried on by the Bureau for a period of six months, beginning with April 1, and ending September 30, 1891. The "Help wanted" and "Situations wanted" have been carefully taken from seven of the large daily papers of the State, three located at St. Louis, two at Kansas City, and two at St. Joseph. These advertisements have been classified with reference to occupations, and results are given in the following tables:

## ST. LOUIS.

|                                           | Help wanted..... | Situations wanted. | Excess of help over situations wanted. | Excess of situations wanted over help... | Ratio of supply to demand..... |

From an examination of the foregoing tables, it will be seen that in St. Louis 299 persons wanted book-keepers, and that 1,082 book-keepers wanted situations; or, the supply was 3.61 times the demand. In the case of housekeepers the supply is 2.31 times in excess of the demand, the figures standing 276 to 668; but in all other cases the demand is far in excess of the supply.

The total for St. Louis shows that in the occupations given, 122,384 persons were wanted, while only 13,919 persons wanted situations. Of course the reader understands that thousands of people in the cities secure positions through their own efforts and those of the labor agents, and that they do not advertise in the papers at all; the foregoing data, therefore, must be considered as a suggestive, rather than a positive value.

In Kansas City the showing is quite different from St. Louis. In the case of book-keepers, boys, dress-makers and seamstresses, compositors, house-keepers, stenographers and nurses, the supply is in excess of the demand, while in the other occupations the reverse is the case. The supply and demand are much nearer equal in Kansas City than in St. Louis. In St. Joseph there are only three occupations, book-keepers, house-keepers and stenographers, in which the supply is greater than the demand. In the total for the three cities, the supply is only 14 + per cent of the demand, the figures showing that 162,190 advertised for help, and only 22,835 persons advertised for situations.

## MISSOURI'S SURPLUS.

Among other investigations taken up by the Bureau during the present year, and perhaps the one giving the most general information, is that showing the commodities marketed in car-load lots from each county during the year 1890.

For nearly two years the Bureau has been receiving letters from different parts of the United States, requesting information as to what portions of the State are best adapted for raising certain things. Some wish to know the counties best adapted for raising fruit, others the best wheat and corn counties, and the best counties for stock; still others want to go into a good timbered district, and others where coal, lead, zinc and iron could be found.

Your Commissioner thought if an investigation could be made, showing the products of the farm, factory, forest and mine that were marketed in carload lots from the different counties of the State for the past year, it would answer many of the questions referred to. In order to make an investigation of this kind, it was necessary to get from each railroad and river shipping point in the State their out shipments during the year 1890, as the out shipments of a commodity from a point indicate a surplus of that commodity, and the in shipments a want of a surplus; the former are the only ones considered in this investigation.

There are 917 railroad shipping points and 154 river shipping points, or a total of 1,071 places where the surplus commodities are shipped to the various markets of the United States. These 1,071 shipping places are located in 106 counties, eight counties having neither railroad nor river shipping facilities. Of the 917 railroad shipping points mentioned above, there are on the

The shipments from St. Louis and Kansas City are not considered in this investigation, as it was difficult to get them, and there is very little shipped from these cities but what has come originally from some county in the State, and the county has already been given credit for the shipment. Of course these cities are given credit for the shipments of fire-brick, tiling and sewerage supplies, because the raw material is obtained from near the works. The counties adjoining these cities are given credit for the stock driven into the stock-yards, and are also given credit for the grain delivered by wagon to the different flour and grist mills of St. Louis and Kansas City. Other than these, no shipments are considered from these two points.

From an examination of the following tables, it is interesting to note what counties excel in certain commodities. Nodaway county, for instance, marketed more cattle and hogs than any other county in the State. The shipments show that this county during the year 1890 marketed 2,118 cars of cattle. An average of 20 head to the car, or 42,360 head of cattle, at an average value of \$40 per head, gives \$1,694,400, which this county realized from her surplus cattle. Then the hog shipments of 1,557 cars, with an average of 60 head to the car, gives 93,420 hogs. Suppose they weighed 200 pounds each, at 4 cents per pound, or \$8 to each hog, gives \$747,360 realized from the surplus hogs. These two items alone make nearly \$2,500,000 which was brought into Nodaway county during the year 1890.

The shipments show that Bates county leads in coal, Jasper in zinc, Saline, Lafayette and Franklin in wheat and flour, Saline in horses and mules, Phelps and Pettis in sheep, Pike and Linn in fruit, Marion, Shannon, Wayne, Carter, Stoddard, Cape Girardeau and Butler in lumber and ties, Greene, St. Louis and Marion in lime and cement, Cass and Bates in flax, St. Francois in lead, St. Francois and Washington in cord-wood, St. Francois and Iron in iron, and Scott and Mississippi in watermelons.

As the boat shipments were difficult to reduce to car-load lots, it was thought best to show them just as they were received on board: cattle, hogs, sheep, horses and mules by the head, wheat, oats and corn

by the sack, apples by the barrel, cotton by the bale, poultry by the coop, etc. Some of the counties therefore will appear twice, one showing railroad shipments, the other boat shipments; and in order to get the surplus for these counties, both shipments must be considered. This is the case with all the Missouri and Upper Mississippi river counties. The counties of St. Genevieve, Perry and Pemiscot have none but river shipments and the counties of Ozark, Taney, Stone, Douglas, Dallas, Hickory, Maries and Cedar have neither railroad nor river shipping facilities, and, as has been stated, will not be considered in this investigation. Much more time and labor was required to get the river shipments than to get the shipments from the railroads; and the shipments on two of the Missouri river boats, the Helena and the Benton, for a period of six months, are not included in the investigation, as the books of both these boats for the above length of time were destroyed and it was impossible to get the information from any other source.

The reader will see by consulting the table, there was shipped during the year 1890, 440,398 car loads of surplus commodities.

Of this number there were of:

| from Kan. C.                | 1,778 cars pressed brick and sewer pipe.....  | \$91.06 per car.....                  | 161,908       |
| Totals.....                 | 440,398 cars.....                             |                                       | \$106,903,183 |

The reader understands that miscellaneous shipments contain not only stock and grain of all kinds, but fruit, lumber, ties, pottery, minerals, in fact something of everything shipped from the State; and if the output of a certain commodity in the different counties does not come up to what it should, it will be found in the miscellaneous column. This investigation not having heretofore been made, it was found impossible to make the classification any nearer than has been done.

In placing a valuation on the different commodities, great care has been taken to make it a conservative one, and from an examination of the table showing "value of surplus commodities," the reader will find that the values fixed are far from excessive. In placing a valuation on the 72,828 cars of miscellaneous shipments, it must necessarily be an approximate one. There are 52 commodities that enter into the miscellaneous shipments, such items as glass, tobacco, gravel, wood, posts, piling, brick, pickles, castor-beans, tiff, watermelons, bran, meal, pottery, eggs, saw dust, hides, nursery stock, cotton, ice, corn-cobs, etc., etc., vary in value from several thousand dollars per car (glass) to less than one hundred dollars per car (saw-dust); but placing an average value on the miscellaneous shipments of \$250 per car makes \$18,207,000; this sum added to the amounts realized from the surplus cattle, hogs, etc., gives a grand total for the entire State of \$106,903,183. See page 152.

The reader must remember that during the year 1890 there was continued drouths and in consequence the grain and feed crops were cut very short; that the price of live-stock of all kinds was low, and no more was shipped than could be helped; that the beginning and ending of 1890, the weather was mild and the demand for coal was limited; that owing to the stringency of the money market few railroads were built, and consequently but little demand for ties and bridge-building material; but in the face of all these facts Missouri produced a surplus valued at \$106,903,183. This certainly is an excellent showing, and one that will compare favorably with any country. The above sum does not include the value of shipments made in less than car-load lots, nor the value of the immense amount of fruit, poultry, butter, eggs, etc., etc., shipped by express.

Without the hearty co-operation of the owners of steamboats and managers of railroads, it would not have been possible to give this information. As soon as the subject was presented and explained, each seemed anxious to contribute his effort for the information of the public and benefit to the State, and at once gave an order that the information be furnished, or permission to the Bureau for its collection. Many of the station agents on the railroads, especially at the ordinary sized places, usually perform multifarious duties, leaving little time

during working hours to compile the shipments; besides, the books kept at the stations do not conform to the queries of the Bureau. Railroads generally tabulate shipments as tonnage; cattle, horses, mules, hogs and sheep as live-stock; corn, wheat, oats, barley, rye, etc., as grain; whereas it is important that each commodity be separately set forth, so as to show the specific stock, grain or mineral of a given county.

The more accurate in detail, the more interesting and valuable this data would become. To say that a county shipped one hundred cars of miscellaneous freight does not impart precise knowledge; they may have been car-loads of horses, pig-lead or wheat, but the primary object is defeated by not being specific. When the products of a county are various in the aggregate, they may be said to be miscellaneous, but usually each car is a unit of some one product, with an occasional exception of a car-load of mixed live-stock.

The Bureau is impressed with the importance of continuing this investigation next year, and if it can have the same co-operation of the transportation companies, it will endeavor to eliminate, or at least minimize the miscellaneous column, and also hopes to compile the shipments in less than car-load lots, and also express shipments of poultry, eggs, berries and vegetables, which altogether will aggregate a large tonnage, and represent hundreds of thousands of dollars which should be added to Missouri's surplus.

## MANUFACTORIES IN MISSOURI.

---

Heretofore the Bureau has only presented a meager exhibit of the manufacturing industries of the State. Those desiring any information relative to data touching this subject, have been only able to glean it from the government statistics compiled at intervals of a decade. Few, comparatively, have these compilations, making it a difficult matter for the average citizen to inform himself when disposed to do so.

Outside of the city of St. Louis, the showing is quite complete from all the counties visited except Crawford county, in which is located the Midland Blast Furnace company, and the Sligo company—both refusing to make a report. The Southwest Missouri Lumber company at Willow Springs, Howell county, failed to send their report after promising to do so. The Crystal City Plate Glass company is classified with the St. Louis factories, as it is the only works of the kind in the State outside of St. Louis; Jefferson county, therefore, loses this showing in order to prevent exposing the returns of a single establishment. With these exceptions, and small mills located in country places, and making allowance for an occasional oversight which may have happened, the statistics given for 86 counties are complete. All the counties in North Missouri (44) are included, and 42 counties south of the Missouri river were visited. It was quite easy to gather information in this territory; with scarcely a single exception it seemed to afford the people with whom the agents came in contact real pleasure to give any information that would be of any advantage to the Bureau or the State. Their ledgers were open to inspection and every proper facility afforded for a complete and accurate exhibit. In the city of St. Louis it was much more difficult, though the agents were with few exceptions treated with courtesy. The time of city people is more engrossed with affairs; they are called on much oftener and have to consider such a variety of things, may, in part, account for the seeming tardiness with which they responded; but there were many exceptions, as quite a number of reports were returned promptly. It is gratifying to say that the Bureau is able to present a showing from 557

establishments in St. Louis as against 160 in the report of 1890. The very large manufactories, with scarcely an exception (except the cracker factories), made returns, so that an estimate of the showing is 85 per cent of the volume of the manufacturing done in that city by those the Bureau asked to make returns, though the number not reporting, while small comparatively in amount of goods manufactured represent in the neighborhood of one-third of those classed as factories.

The time and money at the disposal of this department would not permit the scope of inquiry made by the United States government at the decennial periods, and is limited to what we conceive to be the most obvious and prominent forms. "Manufacture," as defined by Webster, is "the process of reducing raw materials to a form suitable to use, by the hands, by art or by machinery;" hence the shoes made by a shoemaker and sold direct to the consumer, the bread of the baker, the suit of the tailor, the building trades, the constructing of streets, and painting a picture, and in illimitable ways are raw materials reduced to form suitable to use by hands, by art and by machinery. By pursuing inquiry on this line, the number of factories could be greatly multiplied, and the aggregate product wonderfully augmented. The amount of the manufacturing done is not the purpose but an incident to the collection of other data deemed important by the framers of the law creating the Bureau. The showing may be valuable, not because it is an exhaustive exposition of the subject, but rather indicative of what a complete exhibit would be. Some lines—for instance breweries, tobacco factories, flour mills, etc.—are complete; in many others, some mention of which is made further on, are not complete. No one need be misled if he will bear in mind that the showing is only for the number and kind of establishments mentioned, and is therefore not in conflict with showings which have or may be made, embracing more or different data than is here presented.

Missouri averages so high in the production of the cereals, live-stock, grasses, fruit, lead, coal, lumber, iron, zinc and manufacturing in such varieties that she is scarcely expected to lead in any one thing. Her flour industry, however, is so large as to place her second among the states. Of the 307 mills, 9 are located in St. Louis, 3 in Kansas City, 4 in St. Joseph, and 291 are distributed in 77 of the 86 counties visited. In these mills 1888 people are employed—1865 males and 23 females; \$1,038,454 are paid out for wages and salaries; \$212,587 for insurance and taxes; \$23,997,693 for wheat. The flour manufactured is valued at \$29,544,101. St. Louis leads any city in the Union in several lines, but as the United States statistics for this decade have

not been published, it is not possible to make comparison to determine whether it might also place Missouri ahead in these lines.

St. Louis is first in beer, valued at \$11,039,705—an increase of \$800,169 over 1890. She is also ahead in the manufacture of tobacco, producing \$13,007,554.90. More tents are made in St. Louis than elsewhere; indeed she produces about one-half that are made in the United States. She is the pressed brick center. The Missouri clay is especially adapted to building brick, and when burned has the rich red color so much admired and which can only be found in a few favored localities. More fire-brick and sewer pipe is made in St. Louis than in any other city. The showing is gratifying in the production of railroad cars and street cars; these items foot up \$4,640,636.48. She is one of the furniture centers, her output being \$1,950,592. With incompleated returns, the value of carriages, buggies and wagons is \$2,741,600.67. Clothing shows a valuation of \$3,959,631. The cooperage industry is large, \$1,181,353.75. Flour, \$6,429,070.62. Glass aggregate \$1,492,188. Soap and lard, \$2,822,600. Chemicals and medicines, \$2,838,653.29.

|                                              |             |
|----------------------------------------------|-------------|
| Under the head of iron products we have..... | \$3,838,500 |
| Foundries and machine shops.....             | 3,151,037   |
| Stoves .....                                 | 1,595,518   |
| All forms of iron.....                       | 8,585,055   |

The exhibit for bags and bagging is incomplete, but what we have shows \$2,881,000.

The most marvelous progress, perhaps, is shown in the item of shoes, \$3,274.048. Twenty years ago the amount of shoes made was not worth mentioning. In this period she has leaped ahead of all competitors except Boston, and by the end of this century will probably be the shoe market of the world.

This synopsis may be of interest to those who prefer a general outline at a glance. In the review of the counties only the more prominent industries will be mentioned, with additional mention of establishments especially large, or that are characteristic of or peculiar to the locality:

**Adair**—Has two cigar factories, flouring mill, variety works, wagon factory.

**Andrew**—Creamery, two flouring mills.

**Atchison**—Tile factory, creamery, flouring mill.

**Audrain**—Largest fire-brick works outside of St. Louis; two flour-mills; one among the cigar factories employs 13 persons.

**Barton**—Fruit evaporator; two flour mills; foundry; cigar factory.

**Bates**—Zinc smelter, employs 130 men; four flour mills; cigar factory, employing twelve hands; foundry.

**Boone**—Broom factory; cigar factory; wagon factory; four flour mills; the largest publishing house in the State outside of the large cities.

**Buchanan**—St. Joseph is a prosperous city with returns from eighty-one factories, employing 3,048 hands, 1,862 males and 1,186 females; value of goods manufactured, \$7,000,125.65; she has the largest woolen mill in the West, value of product, \$263,259; in the manufacture of overalls 497 employes are on the pay-roll, fifty-seven of whom are men and 440 women, and producing \$587,000 worth of goods, in which she leads any city in the State; she also produces \$560,000 in men's furnishing goods, employing 61 men and 595 women; total, 656.

**Butler**—Has the largest stave factory in the world; basket factory; the saw-mills employ 460 men, and produce \$346,000 in lumber.

**Caldwell**—Two flour mills; furniture factory.

**Callaway**—Large lime interest; fire-brick works; three flour mills.

**Cape Girardeau**—Seven flour mills; four cooper shops; earth-paint mills; in all twenty-four establishments, employing 157 men, producing value amounting to \$935,581.83.

**Carter**—Has the largest saw-mill plant in Missouri; employes 500 men; value of product, \$400,000; also five other saw-mills, employing in the aggregate 185 men; the lumber valued at \$185,000.

**Carroll**—Two tile-works; canning factory; creamery, agricultural implement works; six flour-mills; two foundries; four saw-mills; one novelty wood-works; two factories for prizing tobacco, altogether employing 515 men and 89 women, total, 604; value of products, \$771,222.

**Cass**—Carriage factory; canning factory, which employs 50 males and 50 females; woolen-mill of importance.

**Chariton**—Three tobacco factories; four flour-mills; four cigar factories; creamery; canning factory; tile-works.

**Clark**—Largest pickle works in the State outside of St. Louis; canning factory; flour mills.

**Clay**—Largest handle factory in the State, employing 80 men; the handles bring \$117,900; three distilleries; four flour-mills.

**Clinton**—Two cheese factories; three flour-mills; one cigar factory.

**Cole**—Two large flour-mills; three shoe factories; paper box factory; two foundries; six cigar factories; planing mill; two brick-yards; one brewery.

**Cooper**—Two potteries; cooper shop, employing 15 men; carriage factory; foundry; tobacco factory; six flour-mills; value of products, \$621,737.

**Crawford**—Two of the largest iron blast furnaces in the State, which do not appear in the tables for reasons given; three flour-mills.

**Dade**—Stone works; two lime works; creamery; three flour-mills.

**Davies**—Four flour-mills; one wood-work factory.

**DeKalb**—Creamery; two flour-mills.

**Dunklin**—Two stave factories; three saw-mills, altogether employing 250 men.

**Franklin**—The largest zither factory in the United States; largest corn-cob pipe factory in the State; brewery; carriage and plow factory; cheese factory; creamery; shoe factory; five flour-mills; other factories all aggregating 27, giving employment to 245 persons; products valued at \$311,343.

**Gasconade**—Wine company; brewery; flour-mill; machine shop.

**Gentry**—Handle factory; two tile works; four flour-mills; broom factory.

**Greene**—Next to St. Louis, it has the largest wagon factory; three tobacco factories; saddle and harness factory; evaporator; carriage factory; two cooper shops; five cigar factories; creamery; eight flour-mills; three foundries; ice plant; four planing-mills; one stone works; four lime-kilns of capacity which makes the county first in lime.

**Grundy**—Two flour-mills; wagon factory.

**Harrison**—Woolen-mill; two wagon factories; furniture factory; canning factory; flour-mill.

**Henry**—Large deposits of finest potter's clay; six potteries, one of which is the largest in the State; ranks next to St. Louis and Kansas City in the production of sewer-pipe; vitrified brick works; tile works; five flour-mills.

**Holt**—Two flour-mills; fence factory; excelsior factory; canning factory; creamery; broom factory.

**Howard**—Two large flour-mills.

**Howell**—Large lumber plant at Willow Springs which failed to report; two flour-mills at West Plains.

**Iron**—Two granite quarries, one of which is the largest in the State, producing dimension stone and cut granite; thirteen saw-mills; flour-mills.

**Jackson**—Independence has a large flour-mill; large woolen-mill; foundry; wagon factory, etc. At Kansas City, two agricultural implement factories; four breweries, producing \$1,174,000; bolt and nut-works that employ 150 men and produce goods valued at \$250,000; the largest cereal-mill, making an output of \$640,000; the business of two cracker factories amounts to \$1,100,000; one sash, door and blind factory employs 200 men; large sewer-pipe works; altogether there are 208 establishments, employing 4,224 men, 676 women, total 4,900; value of goods manufactured, \$16,723,665.

**Jasper**—Canning factory; creamery; two evaporators; nine flour mills; eight foundries; two ice plants; brewery; two woolen mills; zinc smelter, employing 80 men; lead works, employing 100 men; three lime kilns; building stone works, employing 914 people, 737 males and 177 females; value of goods manufactured, \$3,227,402.

**Jefferson**—Large plate glass works; two flour mills.

**Johnson**—Two sand-stone quarries; canning factory; six flour mills.

**Knox**—Four wagon factories; creamery; flour mill.

**Laclede**—Four flour mills.

**Lafayette**—Apiary and box factory; three canning factories; brewery; three tile works; furniture factory; hemp factory; ten flour mills.

**Lawrence**—Creamery; canning establishment; two lime-kilns; eight flour mills.

**Lewis**—Saw mill, employing 110 males and 12 females; planing mill; two flour mills.

**Lincoln**—Four flour mills; wagon factory.

**Linn**—Two creameries; six flour mills.

**Livingston**—Church fixtures works; two novelty wood works; handle factory; stave factory; two flour mills.

**Macon**—Wagon factory; creamery; foundry; four flour mills.

**Madison**—Lead works, employs 300 men; two saw-mills; two flour-mills.

**Marion**—Third in the manufacture of cigars; second in lime; the product of one saw mill is \$400,000 annually; second in stoves; six planing mills; five flour mills; two breweries; five cooper shops; foundry.

**Mercer**—Flour mill; wagon factory; woolen mill.

**Mississippi**—Saw-mill, employing 200 men; flour mill; basket factory.

**Moniteau**—Woolen-mill; pottery; three flour mills.

**Monroe**—Seven flour-mills; woolen factory.

**Montgomery**—Two tobacco factories, employing 151 males, ninety-five females—total, 246; produced goods valued at \$448,000; box factory; three flour-mills.

New Madrid—Saw-mill, employing 125 men, runs day and night, except Sunday; lighted by arc and incandescent lights.

Newton—Lead smelter; two wagon factories; plow factory; foundry; seven flour-mills.

Nodaway—Two creameries; two tile-works; carriage factory; seven flour-mills.

Pettis—Candy factory; brewery; carriage factory; furniture factory; ice plant; woolen-mill; pants, shirts and overall factory; agricultural implement works; seven flour-mills.

Phelps—Two flour mills.

Pike—Second in manufacturing tobacco; paper mill; woolen mill; one cider and two vinegar works; twolime-kilns; two carriage factories; foundry; planing mill; two stone works; five flour mills.

Platte—Brewery; two distilleries; three flour mills.

Polk—Largest charcoal works in the west; creamery; evaporator; seven flour mills.

Pulaski—Stave factory.

Putnam—Two flour mills.

Ralls—Two flour mills; straw-stacker factory.

Randolph—Two rake and stacker factories; wagon factory; four flour mills; foundry; railroad machine shops employing 500 men.

Ray—Box factory; canning factory; four flour mills.

Ripley—Five saw mills.

St. Charles—Next to St. Louis city in the manufacture of railroad cars; tobacco factory; two breweries; five flour mills.

St. Clair—Cheese factory; two flour mills.

St. Francois—First in pig-lead, employing 965 men, producing goods valued at \$1,352,210; granite block works; four wagon factories; five flour mills.

Warren—Wagon factory; two flour mills.

Washington—Ten lead smelters; flour mill.

Wayne—Wagon spoke factory; flour mill; five saw mills.

Worth—Two flour mills.

The totals for the manufactories visited are as follows: 1,849 establishments employ 63,399 persons, of which number 52,434 are males and 10,965 females; amount paid out for salaries, \$31,441,919.18; for taxes and insurance, \$6,115,815.25; value of raw material used is \$95,952,192.24; value of goods manufactured, \$161,537,092.91; of this amount St. Louis produced \$98,887,742.91, or a little more than 61 per cent; gives employment to 7,613 females, or nearly 70 per cent; 30,778 males, or nearly 59 per cent; total, 38,390 persons, or nearly 60 per cent of all employed in factories. The general condition of factory employes in Missouri is treated under the head of "Factory Inspection."

Nothing more need be said except to remark that if the mills in the lumber section would adopt weekly payment they would be in line with the great industries in the other parts of the State. Nothing in this connection is more gratifying than the practical unanimity of the factories in the prompt payment of wages weekly. There are no

insuperable objections to be urged against the adoption of this just plan by the mills of Southeast Missouri.

The factories of Missouri are prosperous with scarcely an exception. This is not intended to imply that they are unduly so. There are, of course, favored industries, favored because of little competition or by a protective tariff, but the great majority are prosperous only to the degree deserved consonant with the risk incurred, the capital employed, and ability in management. This Department deals only with facts as they are, leaving to others the pleasing task of foretelling what are the possibilities of future developments. However, in closing this chapter, it may be pertinent to express in one sentence the matured opinion of every loyal, thoughtful citizen of the State, that Missouri in her resources is abundant and unique. The ideal State unites, in happy proportions, agriculture, fruit, stock-raising, minerals, coal, stone, fire-clay, timber and water. No contiguous territory of approximate area is so fruitful of all the elements of prosperity as is united in this great commonwealth.

For details see the tables that follow, which show the manufacturing industries for each county and the city of St. Louis, the showing in aggregate of the leading articles manufactured, and the totals for the entire State.

\* In Howell county the Southwest Missouri Lumber company is not included. In Crawford county the Silico and Midland furnaces are not included. In Jefferson county the Crystal City Glass works is not included. In Cole county the return of only one Penitentiary contractor is given.

The tables immediately following are tabulated from reports made by the proprietors of the industries, and show the average daily wages paid employes in trades named in the counties in which they are located, not including the city of St. Louis, which appears fully under the head of factory inspection for that city.

Brick-making in these counties only lasts during the summer season, usually about four months. In the other lines the opportunity for work is continuous, or nearly so.

### AVERAGE DAILY WAGES PAID IN MISSOURI BRICK-YARDS.

| Counties.      | No. of brick-yard | Average daily wages paid laborers | Average daily wages paid molders | Average daily wages paid foremen | Average daily wages paid brick and mud-wheelers | Average daily wages paid pit-tilters | Average daily wages paid setters | Average daily wages paid boys | Average daily wages paid temperers | Average daily wages paid burners |

Of the 18 factories—

13, or 72½ per cent, pay their employes weekly.

5, or 27½ per cent, pay their employes monthly.

Of these—

13, or 72½ per cent, withhold no wages on pay-day.

3, or 16½ per cent, withhold 1 day's wages on pay-day.

2, or 11½ per cent, withhold irregular number of days—one 15 and the other 16.

## JASPER COUNTY.

In the 22 factories inspected in Jasper county, there were employed :

|                                  |     |
|----------------------------------|-----|
| Men.....                         | 633 |
| Boys under 12 years of age.....  | 17  |
| Women .....                      | 172 |
| Girls under 14 years of age..... |     |
| Total.....                       | 822 |

Of the 22 factories—

19, or 86 per cent, pay their employes weekly.

1, or 4 per cent, pay their employes bi-weekly.

2, or 9 per cent, pay their employes monthly.

Of these—

20, or 90 per cent, withhold no wages on pay-day.

1, or 4 per cent, withhold 1 day's wages on pay-day.

1, or 4 per cent, withhold 2 days' wages on pay-day.

Table showing the number of employes, and how often paid, in the 1297 factories inspected in the State of Missouri.

|                     | No. of factories inspected..... | No. of employes. |                |             |                 | Total number of employes..... | Employes paid w'kly. | Empl. paid bi-weekly. | Empl. paid monthly. | Empl. pd. semi-mthly. |

It is gratifying to note that while to many proprietors and managers of workshops a visit of inspection was regarded as something new, and the object of such inspection was frequently misunderstood, there was a very general acquiescence in the propriety of the law authorizing an inspection. Considerable objection was made as to the supposed frequency of these visits and inquiries in some establishments, but upon an explanation being given, it was found that this misapprehension arose from a confusion of the agents of the United States Census Bureau, the Jury Commissioner, and the agents of this Bureau, and an amicable result was usually secured, there being but two cases of absolute refusal to answer the inquiries upon the inspection blank, but by a little judicious circumlocution the information desired was obtained. It is to be regretted, however, that in some cases the inquiries were regarded as unimportant, and answers were given at random, some of which there was reason to believe were inaccurate. But taken altogether, it is reasonable to conclude that the information obtained relative to the number of employes and their average daily wages is as nearly correct as it is possible to get them.

It may be noted with pleasure that in almost every instance where a new building is constructed for manufacturing purposes, an effort is made by the owner to comply with all the sanitary and other regulations concerning workshops, and since the enactment of the factory inspection law, a marked improvement has been made in the condition of the shops in the cities. Yet there are hundreds of establishments located in old buildings which are being used for other purposes than that intended at the time of their construction, and are sadly deficient in means of egress and safety of the toiling hundreds of employes engaged therein. Especially is this the case where an individual is running a shop as a sub-contractor for some larger firm, a vacant room in some upper story or a basement being rented, and no sign out to indicate the existence of a workshop, and it is only by accident or persistent search that any information can be gleaned.

The section of the law requiring individuals and corporations establishing new factories or workshops or removing to new quarters, to notify the Labor Bureau of that fact, and also the section requiring all owners of workshops, etc., to notify the Bureau of all accidents to their employes within two weeks after the occurrence of such accident, have both been entirely ignored. The cause of this negligence is doubtless attributable to the fact that the owners and managers of workshops are not generally aware of the existence of a law requiring them to give such information.

When an accident does occur, it is almost invariably attributed to the carelessness of the employes, and while this may be true in many cases, the factory inspector has endeavored to suggest to proprietors some remedy in each case whereby it would be impossible for such accidents to occur, even if the employe were at fault. It is difficult to do so in all cases, especially where an employe deliberately removes some safeguard which may be placed around the gearing of machinery or a box around belting or shafting, because it seems to be in his way and causes him a few extra steps in the discharge of his duties. The matter of thoroughly guarding machinery is a very perplexing one, and requires both judgment and experience, and suggestions offered by an inspector are very frequently repudiated as impracticable by both employer and employe, who claim that the placing of guards around most machines to any extent would impair the usefulness of the machines and diminish the output. In some few cases, however, the liability to accident could be avoided by a few simple devices which would not affect the working of machines. For instance, in bakeries, flour mills, and on mangling machines in laundries, a board or other covering might be placed over the rollers of sufficient size to prevent the operator getting his fingers near enough to be caught between the rolls, etc. In planing mills and furniture factories, where circular and traveling saws are largely used, there seems to be no reason why adjustable hoods or caps might not be hung or fixed over the saw, the hood to be made sufficiently strong to prevent either any one falling on the saw from above or the board being caught up and carried over the saw and thrown forward with sufficient force to kill any one who may be in its way. It may be and is urged that there is no necessity for such guard, as the saw is usually set sufficiently far inside the cutting table to prevent the operator or other person from falling upon it; yet experience has shown that even the most careful and skillful operators have been subjected to serious and often fatal injuries through failure to provide such guard.

Much danger might also be averted were some device adopted and enforced to prevent the close contact of the hands of the workmen with such machines as shapers, carvers, wood and iron planers and frizzers. There is a tendency among workmen to dispense with the use of guards in operating these machines, but if some arrangement could be made whereby an automatic clamp could be attached, its use would not depend upon the caprice of the workmen. But one of the greatest dangers connected with this class of work lies in the employment of boys of tender years to operate the machines. In some cases, the boys are too small to reach up to the machine, and stand upon boxes or tempo-

rary pedestals or platforms, and thus incur greater danger than if they were standing upon the floor. To obviate this state of affairs, and place all employers upon an equality, it would probably be better if the law was so amended as to prohibit the employment of any boy under 16 years of age as an operator upon any drill, mortising and tenoning machine, saw, planer or shaper, or in any capacity in any machine shop or planing mill, where it is necessary for him to operate any fast running machine; nor should any boy under 16 years of age be allowed to operate any stamping machine or punch where the ponderous stamp is operated by either continuous steam power or by foot. The dangers of feeding the machine and the necessity of withdrawing the hand rapidly are too great to permit a boy to work in these vocations, unless the stamp be controlled by the hand after it has been withdrawn from the machine. It may be said that too much time would be lost by such a power; but the danger of maiming would be lessened, or the boy may be supplanted by one of maturer years. It is but just to add that in some cases proprietors do not desire to employ small boys, but they are solicited by employes to allow their children to work, the employer only permitting these children in his establishment on condition that he would not be responsible for any injury they might receive. At present there is no inhibition upon the employment of boys of any age, except in mines. Such inhibition would place this State in line with other states having factory inspection laws.

The matter of guarding elevators and hoistways is left a comparatively open question by our laws, and many establishments have guards to their elevators which, while they comply with the legal requirement, are wholly inadequate for the purpose intended. The placing of guard-rails, while accepted as being a compliance with the demands of the law, is of very little practical benefit, since they are not only frequently left open through the failure of employes to replace them after using the elevator, but they are often either removed or tied up to keep them open. To this negligence may be added the danger of a person leaning against them and their giving way, or of his leaning over when the platform is descending and having his head caught by the floor of the platform, from both of which causes accidents have occurred during the past year. While the most efficient means of guarding elevators is a matter that admits of wide discussion, it seems clear there can be but little doubt that the use of automatic gates would subserve the object sought better than any other method now in use. These gates would open or raise automatically when the platform of the elevator reaches the floor upon which they are located, and close as soon as the elevator leaves that floor, thus obviating any danger

through negligence of the operator. To be of service, these gates or any other means of enclosure should be at least four or five feet high. While some establishments still use the old-fashioned rope and hook hoists, the same danger of falling down the hatchway exists as in the case of unguarded elevators, and the inadequacy of the guard-bar is equally as great, and all such hatchways should be boxed up to the height of four feet, with a gateway to the entrance of such hatch.

The requirement of law that doors of factories and work-shops shall open outwardly, if the Inspector shall so direct, has thus far been left almost entirely to the Inspector, thus devolving upon him the duty of determining the necessity of the doors being so hung. Of the establishments visited, scarcely 5 per cent have their doors opening outward; about 10 per cent of the doors slide and the balance open inward.

The construction of outside fire-escapes has been the only class of orders given by the Inspector where serious opposition was encountered—the parties notified urging either non-ownership of the property occupied, or that the means of egress were ample and that the construction of a fire-escape would be an unnecessary expense. But as the statute is mandatory upon this point, no discretion is left the Inspector. In some cases the order for construction of fire-escape has been complied with, but in others it may be necessary to institute legal proceedings to compel a compliance with the statute.

One of the most fruitful sources of injury to employes during the past year has been the bursting of emery wheels. Upon diligent inquiry among skilled mechanics, it appears that while such accidents are liable to occur at any time, there is not necessarily any greater danger to be apprehended from this source than from the use of a lathe or any other machine, if due diligence be observed in properly balancing the wheel; and it has been suggested that, by the use of clamps or brace-plates at the sides of the wheel, absolute immunity from danger may be secured, especially if the speed of the wheel be within the limit guaranteed by its manufacturers.

In regard to the sanitary condition of work-shops in St. Louis, it is with pleasure that we note a marked improvement over former years, greater attention being given to ventilation, sanitary plumbing, deportment of employes inside and outside the work-shop, increase of water closets, furnishing of dressing and wash-rooms, improved heating apparatus, and a general cleanliness of work-shops, than was ever thought of prior to the passage of the law authorizing inspection. While there were formerly many work-shops in St. Louis, and in other cities in Missouri, that might properly be termed "sweat-boxes," the

number of such shops in St. Louis is very small; and upon informing the proprietors of two establishments of the over-crowded condition of their shops, they promised that their quarters would be enlarged before commencing the next season's business. While in a few cases both sexes were found using the same closets, a prompt compliance with the law was promised, the invariable excuse offered for the existing state of affairs being that the parties interested were only tenants, and that the owner of the building would not provide the necessary number of closets.

The usual method of operating sewing machines in shoe factories and clothing factories is by placing the main shafting about eight inches from the floor and in the center of a long sewing table about five feet wide. Ordinarily there is but little danger to the sewing girl operating these machines, but occasionally when a spool or piece of material is dropped, the girls stoop under the table to pick it up, when if they wear their hair loose or in braids, there is a liability of its becoming entangled with the shafting, and as an accident has occurred from this source, whereby a part of the scalp was torn from the head of a sewing girl, it seems that it would be proper to require this class of shafting to be thoroughly boxed.

In concluding this introductory to the tables showing the condition of the factories inspected, it is but proper to say that, with few exceptions, a cordial reception has been given to the Inspector, and words of encouragement and hopes of good results which have been expressed by leading manufacturers have been so frequent as to clearly indicate the sympathy of employers with the law, and the interest manifested in its thorough enforcement.

TABLE SHOWING THE CONDITION OF WORKSHOPS AND FACTORIES.  
AUDRAIN COUNTY.

| Establishment No. | Name of establishment.     | Average No. of employees. |               |       | Total number of employees in factory | How often are employees paid? | How many days' wages are withheld on each pay-day? | Weekly hours of labor | Minutes allowed for dinner | Do employees belong to labor organization? | During year has been | Weeks. | Are doors unlocked during hours of labor? | Is there elevator for employees? | No. of accidents in past year | Do doors open in or out? | No. of outside fire-escapes |
|-------------------|----------------------------|---------------------------|---------------|-------|--------------------------------------|-------------------------------|----------------------------------------------------|-----------------------|----------------------------|--------------------------------------------|----------------------|--------|-------------------------------------------|----------------------------------|-------------------------------|--------------------------|-----------------------------|
